## PREFACE

The Australian Standard Geographical Classification (ASGC) is a classification used by the Australian Bureau of Statistics (ABS) for the collection and dissemination of geographic statistics. The ASGC is an essential reference for users to understand and interpret the geographic context of ABS statistics.

The ASGC divides Australia into six different hierarchies of geographical areas to suit different statistical purposes. The spatial units of some hierarchies (the Main, Statistical Region and Section of State Structures) aggregate to all of Australia, while some hierarchies (the Local Government Area Structure, Statistical Districts and Urban Centres and Localities) cover only a part of Australia of particular statistical significance. The codes and names of all geographical areas used in the ASGC, and the relationship between these areas, are described in this publication.

The date of effect of the ASGC described in this publication (1996 Edition) is 1 July 1996. This edition of the ASGC is part of a three volume set of statistical geography publications relating to the 1996 Census and will be used in disseminating data from the Census. The other two volumes *Census Geographical Areas, Australia* (2905.0) and *Australian Standard Geographical Classification (ASGC) Urban Centres/Localities* (2909.0) are expected to be available in 1997.

If you have any enquires about the ASGC, or suggestions for improvement, please contact the Assistant Director (Area Classification) by telephoning (06) 252 5888 or writing to PO Box 10, Beconnen, ACT 2616.

## CHAPTER 1

## INTRODUCTION

### PURPOSE OF THE ASGC

The main purpose of the ASGC is for collecting and disseminating geographically classified statistics. These are statistics with a 'where' dimension.

The ASGC is a hierarchical classification system consisting of six interrelated classification structures. The ASGC provides a common framework of statistical geography and thereby enables the production of statistics which are comparable and can be spatially integrated.

In practice, statistical units such as households and businesses are first classified or assigned to a geographical area in one of the six ASGC structures. Data collected from these statistical units are then compiled into ASGC defined geographic aggregations which, subject to confidentiality restrictions, are then available for publication.

The purposes of this publication are to outline the ASGC structures, describe the codes and names of geographical areas used and depict the statistical relationship between different types of geography used in the classification.

### CLASSIFICATION STRUCTURES

The six interrelated classification structures of the ASGC are:

- Main Structure;
- Local Government Area Structure;
- Statistical District Structure;
- Statistical Region Structure;
- Urban Centre/Locality Structure; and
- Section of State Structure.

Each of these structures serves a specific purpose and is individually discussed in chapters 2-7.

In Census of Population and Housing years (i.e. years ending with 1 or 6 e.g. 1986, 1991, 1996), all six structures of the ASGC are defined. In intercensal years, only the first four structures are defined.

The Main Structure, the Statistical Region Structure and the Section of State Structure cover the whole of Australia without gaps or overlaps. The other structures cover only part of Australia. These structures are hierarchical, with different structures having different numbers of levels (see table 1). Each hierarchical level is made up of one type of geographical spatial unit. The spatial units at each higher level are aggregations of the spatial units at the previous lower level.

## SPATIAL UNITS

The various geographical areas, or spatial units, which build the different classification structures are as follows:

- Census Collection District (CD);
- Statistical Local Area (SLA);
- Statistical Subdivision (SSD);
- Statistical Division (SD);
- State and Territory (S/T);
- Statistical District (S Dist);
- Local Government Area (LGA);
- Statistical Region Sector (SRS);
- Statistical Region (SR);
- Major Statistical Region (MSR);
- Urban Centre and Locality (UC/L); and
- Section of State (SOS).

During Population Census years, the smallest spatial unit is the CD. It is the basic building block of the six classification structures. Between censuses, the smallest spatial unit is the SLA. Thus for those years when a census is held, all the above spatial units are defined. In intercensal years, all units except CDs, UC/Ls and SOSs are defined.

These spatial units are individually explained in chapters 2–7.

## SUMMARY TABLES

Table 1 summarises the various ASGC structures and their component spatial units.

Table 2 summarises the number of ASGC spatial units in the various ASGC structures as at 1 July 1996.

### 1

#### SUMMARY OF ASGC STRUCTURES

ASGC structure	Hierarchical levels	Component spatial units	Covers whole of Australia?
Main	5	CD, SLA, SSD, SD, S/T	Yes
Statistical District	4	CD, SLA, SSD, S Dist	No
Local Government Area	4	CD, SLA, LGA, S/T <sup>(a)</sup>	No
Statistical Region	6	CD, SLA, SRS, SR, MSR, S/T	Yes
Urban Centre/Locality	2	CD, UC/L	No
Section of State	3	CD, SOS, S/T	Yes

<sup>(a)</sup> Only that part of the S/T which comes under the responsibility of an incorporated Local Government Council or selected Community Government Councils (see chapter 3, p. 19).

### 2

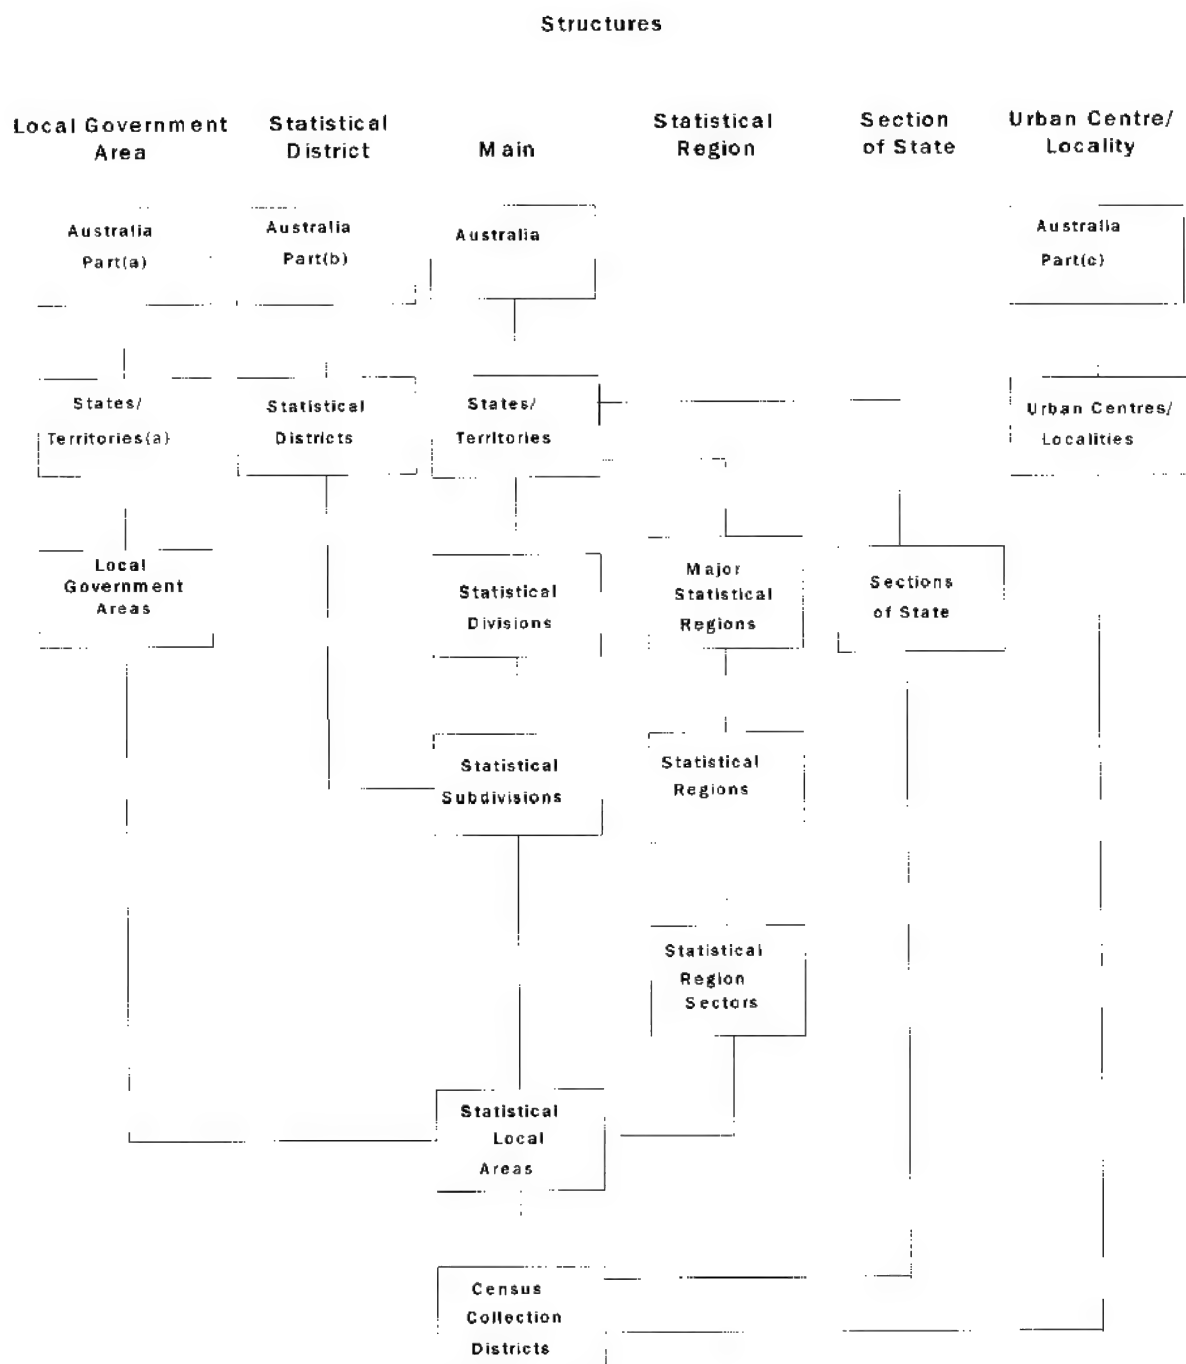

#### SUMMARY OF ASGC SPATIAL UNITS AS AT 1 JULY 1996

Spatial units	NSW	Vic.	Qld.	SA	WA	Tas.	NT	ACT	Other Territories	Aust.
S/T	1	1	1	1	1	1	1	1	1	9
SD	13	12	12	8	10	5	3	2	1	66
SSD	43	45	30	21	26	9	11	8	1	194
SLA	189	200	449	130	151	44	63	107	3	1 336
LGA	177	78	125	118	142	29	8	—	—	677
S Dist. <sup>(a)</sup>	4	6	8	—	—	2	—	1	—	21
MSR	2	2	2	2	2	1	1	1	1	14
SR	23	14	11	6	7	1	1	1	1	65
SRS	25	14	29	6	7	3	2	1	1	88
SOS	5	5	5	5	5	5	4	3	3	40
CD	11 618	7 889	6 372	3 151	3 481	1 089	389	499	12	34 500

<sup>(a)</sup> Counted in predominant State or Territory.

### 3 ASGC STRUCTURES

- (a) Incorporated areas only
- (b) Areas covered by S Dist only
- (c) Areas covered by UC/L only

## PRINCIPLES OF THE ASGC

The ASGC is constructed on the principle that it must fulfil user needs for spatial statistics while also conforming to general classification principles.

### Classification principles

The ASGC is constructed on the basic classification principles that members within one class are of the same type, classes are uniquely defined so as to be mutually exclusive and, in total, the members in each class cover the entire class.

As a result, the geographical spatial units of each hierarchical level in each classification structure of the ASGC are:

- of the same type, delimited by well-defined criteria;
- clearly demarcated by precise boundaries;
- uniquely identified by codes and names;
- mutually exclusive; and
- in aggregate cover the whole area to which that hierarchy applies.

### User needs

The ASGC is designed to meet user needs for social, demographic and economic statistics. The smallest units of the ASGC i.e. CDs at census times and SLAs at intercensal times, have been designed such that they are:

- convenient and efficient for data collection;
- useful and reliable for data dissemination;
- flexible for aggregation to larger units; and
- useful building blocks for user-defined regions.

Thus, CDs are designed for efficient data collection at census times. Each CD covers an area which allows census data to be collected in an efficient and cost effective manner. SLAs are defined on the administrative areas of local governments. Local governments are both a useful source of data and a reliable dissemination unit for users.

As will be explained in later chapters, CDs aggregate to SLAs which in turn aggregate to other larger areas on the ASGC. Each of these geographical areas serves a specific purpose and meets user needs. Many organisations employ the CDs and the SLAs as the building blocks to construct their own geography for statistical purposes.

## DEFINITION OF AUSTRALIA

For ASGC purposes, the ABS uses the definition of Australia as set out in section 17(a) of the *Acts Interpretation Act 1901* which currently defines Australia or the Commonwealth as meaning :

... the Commonwealth of Australia and, when used in a geographical sense, includes the Territory of Christmas Island and the Territory of Cocos (Keeling) Islands, but does not include any other external Territory.

Following the incorporation of Christmas Island and Cocos (Keeling) Islands into geographic Australia (by the *Territories Law Reform Act, No. 104, 1992*, which amended the *Acts Interpretation Act 1901*), these two territories were included in the ASGC from 1 July 1993. Other external territories (such as Norfolk Island) remain excluded. In addition, the treatment of Jervis Bay Territory (an internal territory) in the ASGC changed from 1 July 1993.

Jervis Bay Territory was previously included with the Australian Capital Territory for statistical purposes because of its administrative association with the Australian Capital Territory and because its relatively small size prevented it from meeting confidentiality requirements for statistical output. Following the granting of self-government to the Australian Capital Territory in May 1989, the situation was reviewed and from the 1 July 1993 Edition of the ASGC, Jervis Bay Territory, along with the Territory of Christmas Island and the Territory of Cocos (Keeling) Islands, formed part of a new category, Other Territories, at the State/Territory level. Although included as part of the ASGC, all three of these territories are currently regarded as out-of-scope for ABS censuses and surveys except for the Census of Population and Housing and for population estimates.

## CHAPTER 2

## MAIN STRUCTURE

### PURPOSE

The Main Structure of the ASGC is used to collect and disseminate a broad range of ABS social, demographic and economic statistics. Although the Main Structure is the most widely used and has broad application, the other structures are equally important to their own purposes.

Maps depicting the Main Structure boundaries are provided in chapter 13.

### THE STRUCTURE

The Main Structure has five hierarchical levels at Population Census times, comprising in ascending order: CDs–SLAs–SSDs–SDs–S/Ts. In non-census years, CDs are undefined and the Main Structure thus has only four levels of hierarchy.

In this structure, CDs aggregate to form SLAs, SLAs aggregate to form SSDs and this aggregation principle continues up the remaining hierarchical levels. At each hierarchical level, the component spatial units (e.g. SLAs) collectively cover all of Australia (as defined in chapter 1, p. 5) without gaps or overlaps.

Tables Details of the Main Structure are shown in the following tables in chapter 12 — The Classification Structures:

- Broad Main Structure  
(showing three hierarchical levels: S/T–SD–SSD)

Example:

S/T	SD	SSD	
1			<b>NEW SOUTH WALES</b>
	10		<b>Hunter</b>
		05	Newcastle
		10	Hunter SD Bal

- Detailed Main Structure  
(showing four hierarchical levels: S/T–SD–SSD–SLA)

Example:

S/T	SD	SSD	SLA	
1				<b>NEW SOUTH WALES</b>
	10			<b>Hunter</b>
		05		<i>Newcastle</i>
			1720	Cessnock (C)
			4650	Lake Macquarie (C)
		10		<i>Hunter SD Bal</i>
			2700	Dungog (A)
			3050	Gloucester (A)

In this census edition, a CD listing showing CDs within SLAs by S/T is included at Appendix 4.

## THE SPATIAL UNITS

### Census Collection District (CD)

CDs are designed for use in census years for the collection and dissemination of Population Census data. In non-census years, CDs are undefined. In aggregate, CDs cover the whole of Australia (as defined in chapter 1, p. 5) without gaps or overlaps.

The CD is the smallest spatial unit in the ASGC. CDs aggregate to form the larger spatial units of SLAs in the Main, Statistical Region, Statistical District and LGA Structures, SOS in the SOS Structure and Urban Centres and Localities in the UC/L Structure. Aggregation of SLAs in turn forms the remaining spatial units in the ASGC. Therefore, in census years, the CD is the common denominator which integrates all six classification structures in the ASGC (see diagram 3, chapter 1, p. 4).

The basic concept of a CD is that it defines an area that one census collector can cover, delivering and collecting census forms in about a ten-day period. In urban areas CDs average about 220 dwellings. In rural areas the number of dwellings per CD reduces as population densities decrease. By design, CD boundaries do not cross SLA (and thus LGA) boundaries. Therefore, an aggregation of CDs covers the administrative area of a local government.

For the 1996 Census, 34,500 CDs are defined throughout Australia. In this census edition, a CD listing showing CDs within SLAs by S/T is included at Appendix 4.

### *Delimitation of CDs*

For the 1996 Census, the following criteria were used for delimiting CDs:

- CDs should be consistent with both the collector's workload requirements and their role as a useful spatial unit and building block capable of aggregation into broader level ASGC spatial units;
- the area and population delimited by a CD boundary must not be so great that one collector cannot deliver and collect census forms within about ten days;
- the chosen CD boundaries should, if possible, be readily identifiable on the ground, be defined in terms of permanent features, follow the centre of a road or river if these features are used and should delimit CDs which conform to existing and proposed land uses. The use of major roads as CD boundaries in rural areas should be avoided where possible, i.e. to minimise splitting of identifiable rural localities;
- CDs should conform where possible to existing/gazetted suburb boundaries. CDs must not cross SLA boundaries and, as a consequence, any other ASGC spatial unit boundary;
- CDs should not be designed in such a way as to make them confidential for publication of data. Accordingly, a CD should contain, where possible, at least 100 persons at the next census. For dissemination purposes, Indigenous Community CDs will have a limit of 80 persons; and
- CDs in aggregate must cover the whole of Australia (as defined in chapter 1, p. 5) without gaps or overlaps.

*Special purpose CDs* Special purpose CDs are created so that special enumeration procedures can be applied. They include:

- Indigenous Community CDs;
- Defence Establishments CDs;
- Mining or Construction towns or camps CDs; and
- Major Waterways CDs.

A number of these special purpose CDs have no actual boundary. They are represented as points instead of areas on maps.

Indigenous Community CDs are defined where there is a significant Indigenous population.

Defence Establishments CDs are defined where there is a clear boundary and special enumeration procedures are required.

Mining or Construction CDs are defined when the town or camp is expected to exist for at least two censuses.

Major Waterways CDs consist of water only and contain no population. They are found particularly in major urban areas where an LGA boundary extends from the shore to include part of a body of water.

*Off-shore, shipping and migratory CDs*

Off-shore, shipping and migratory CDs are not spatial units in the usual sense — they have no defined boundaries. They are designed to facilitate the recording of people on census night who are off-shore on oil rigs, drilling platforms and other structures; on board vessels in and between Australian ports; or are in transit on board long distance trains, buses and aircraft.

Off-shore, shipping and migratory CDs are not defined for the Australian Capital Territory and the Other Territories.

For the 1996 Census, Australian residents temporarily in Antarctica are included in the off-shore, shipping and migratory CDs of Tasmania.

*CD codes* CDs are identified by unique six-digit codes within each S/T.

Example:

160501 of New South Wales

051901 of Western Australia

The first two digits identify Field Management Area (FMA). FMAs closely follow federal electoral boundaries and, in most cases, are aggregates of LGAs. The next two digits identify Field Group Area (FGA). The last two digits identify CDs within an FGA. The six-digit code must be used in conjunction with the one-digit S/T code to uniquely identify a CD.

*Statistical Local Area (SLA)*

The SLA is a general purpose spatial unit. It is the base spatial unit used to collect and disseminate statistics other than those collected from the Population Censuses. In non-census years, the SLA is the smallest unit defined in the ASGC. In census years, an SLA consists of one or more whole CDs. In aggregate, SLAs cover the whole of Australia (as defined in chapter 1, p. 5) without gaps or overlaps.

SLAs aggregate directly to form the larger spatial units of SSDs in the Main Structure, SRSs in the SR Structure and LGAs in the LGA Structure (see diagram 3, chapter 1, p. 4). SSDs in turn aggregate to form the larger spatial unit of S Dist in the S Dist Structure (see diagram 3, chapter 1, p. 4). Therefore, the SLA is the common denominator which integrates the four classification structures in use in both census and non-census years.

In this edition of the ASGC, there are 1,336 SLAs in Australia including one SLA in each of the three Other Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands.

SLAs are listed in the table — Alphabetic List of LGAs and SLAs within States/Territories in chapter 12.

#### *Delimitation of SLAs*

SLAs are based on the boundaries of incorporated bodies of local government where these exist. These bodies are the Local Government Councils and the geographical areas which they administer are known as Local Government Areas (LGAs). In the Northern Territory, an incorporated administrative body gazetted under the Northern Territory Local Government Act can take the form of a Community Government Council (CGC). In the remainder of Australia where there is no incorporated body of local government, SLAs are defined to cover the unincorporated areas.

The delimitation criteria for SLAs are as follows:

- An LGA is an SLA if:
  - the LGA fits entirely within a SSD; and
  - the LGA is broadly similar in size, economic significance and user needs for statistics to other LGAs in Australia.

#### *Example:*

the SLA Albury (C) corresponds to the whole LGA of Albury City in New South Wales. In the 1996 Edition of the ASGC, 555 of the total 1,336 SLAs (42%), equate to a whole LGA.

- An LGA forms two or more SLAs when the two conditions above are not met. This can occur when:
  - an LGA is divided by the boundary of one or more SSDs. The LGA is split into two or more SLAs each of which falls within the relevant SSD; or
  - an LGA is substantially different in size, economic significance and user needs for statistics to other LGAs. The LGA is split into two or more SLAs which generally correspond to one or more suburbs (as occurs in the predominantly urban LGA of the City of Brisbane) or other areas of interest.

#### *Example:*

the LGA of Calliope Shire in Queensland is split into two SLAs: Calliope (S) - Pt A and Calliope (S) - Pt B because it is split by a SSD boundary. The LGA of the City of Brisbane is split into 163 SLAs based on suburbs.

- In the Northern Territory, an SLA can be the administrative area of a CGC if:
  - the CGC is broadly similar in size and statistical significance to the other SLAs in the Northern Territory; and
  - there is a significant user need for separate statistics.

Example:

currently, only the SLA of Coomalie (CGC) is defined on this basis but this definition is presently under review due to user demand.

- For those parts of Australia which are not administered by incorporated local government bodies, an SLA is an unincorporated area. Unincorporated SLAs cover the following areas:

- unincorporated on-shore area(s) and/or off-shore island(s) in an SSD;

Example:

Unincorp. Pirie is an unincorporated SLA in the Pirie SSD in South Australia;

Unincorp. Islands is an unincorporated SLA in North West SSD in Queensland.

- that part of an unincorporated area which is considered of sufficient economic significance as to warrant the formation of a separate SLA;

Example:

Petermann and Tanami in Central NT SSD in the Northern Territory.

- Off-Shore Areas & Migratory SLAs, formed for census purposes for all S/Ts except the Australian Capital Territory and Other Territories to encompass off-shore, shipping and migratory CDs (off-shore, shipping and migratory CDs are explained in chapter 2, p. 9);
- the entire area of the Australian Capital Territory is unincorporated. Each SLA is either a suburb, a locality or the non-urban area of an SSD; and
- the major part of the Northern Territory which is unincorporated. In some SSDs (e.g. Daly, Bathurst-Melville) the entire area is covered by one unincorporated SLA. In other SSDs (e.g. East Arnhem), the unincorporated area is split into several SLAs to distinguish an economically significant town (e.g. Nhulunbuy), island (e.g. Groote Eylandt) or administrative region.

SLA name    The naming conventions for SLAs are as follows:

- An SLA which is a whole LGA adopts the name of the LGA including its LGA type as a suffix. Thus, Albany (S) and Albany (T) in Western Australia are separate SLAs. The various LGA types currently in use by States and the Northern Territory are specified in chapter 3, p. 20.

Example:

Ballina (A) — New South Wales Area

Queenscliffe (B) — Borough

Liverpool (C) — City

Coomalie (CGC) — Community Government Council

Barossa (DC) — District Council

Roxby Downs (M) — Municipality

Murray Bridge (RC) — Rural City

Albany (S) — Shire

Albany (T) — Town

- An SLA which is part of an LGA may adopt a hyphenated name the first part of which is the name of the LGA.

Example:

the LGA of Stirling (C) in Western Australia is split into three SLAs:

Stirling (C) - Central

Stirling (C) - Coastal

Stirling (C) - South-Eastern

- If the name includes - Pt A, - Pt B, or - Pt C, this indicates the SLAs were formed by splitting an LGA between one or more SSDs (see example below). In this case, - Pt A usually denotes the more urban part of the split LGA.

Example:

the LGA of the Municipality of Latrobe in Tasmania is split into two SLAs:

Latrobe (M) - Pt A

Latrobe (M) - Pt B

- An SLA which is part of an LGA may adopt a locality or suburb name.

Example:

the LGA of the City of Brisbane in Queensland is split into many SLAs, including:

Acacia Ridge

Albion

Yeronga

Zillmere

- An SLA which covers an unincorporated area does not contain LGA type. In New South Wales, Queensland and South Australia the SLA name may include Unincorp.

Example:

West Arnhem (in Northern Territory)

Bruce (in Australian Capital Territory)

Unincorp. Far West (in New South Wales)

- A small number of SLA names are duplicated across S/Ts and one SLA name is duplicated within a S/T. These names become unique when used in conjunction with SLA codes.

Example:

Campbelltown (C) (New South Wales and South Australia)

City (Queensland and Australian Capital Territory)

City - Inner (Queensland and Northern Territory)

City - Remainder (Queensland and Northern Territory)

Kingston (Queensland and Australian Capital Territory)

Oxley (Queensland and Australian Capital Territory)

Red Hill (Queensland and Australian Capital Territory)

West End (Townsville (C) and Brisbane (C))

SLA code    The coding conventions for SLAs are as follows:

- SLAs are identified by four-digit codes. These codes are unique only within a S/T. For unique Australia-wide identification the four-digit SLA code must be preceded by the unique one-digit S/T code.

Example:

Barraba (A) 0400 (in New South Wales) (S/T code 1)

Barcaldine (S) 0400 (in Queensland) (S/T code 3)

- The fourth (last) digit of the SLA code indicates the following:

- 0 means the SLA is a whole LGA

Example:

Albany (S) 0140 (in Western Australia)

- 1–8 means the SLA is part of an LGA

Example:

Sorell (M) - Pt A 4811 (in Tasmania)

Sorell (M) - Pt B 4812 (in Tasmania)

- 9 means the SLA is either an unincorporated area, an Off-Shore Areas & Migratory SLA or an undefined category (see chapter 3, p. 19; chapter 2, p. 11 or chapter 8, p. 35, respectively).

Example:

Bruce 0729 (in Australian Capital Territory)

Off-Shore Areas & Migratory 9779

- SLAs may also be identified by a full nine-digit code comprising S/T code (digit 1), SD code (digits 2–3), SSD code (digits 4–5) and SLA code (digits 6–9).

Example:

Barraba (A) 130100400 (in New South Wales)

Coober Pedy (DC) 435251330 (in South Australia)

- Within each S/T, SLA codes are in the range of 0001–9990; codes ending with 99 and those within the range of 9991–9999 have been reserved for special purposes (see chapter 8, pp. 34–36).
- In the Main Structure, SLA codes are arranged in ascending numerical order within an SSD. Gaps have been provided between the codes for future expansion or change.

Statistical Subdivision (SSD)    The SSD is a general purpose spatial unit of intermediate size between the SLA (smaller) and the SD (larger) in the Main Structure.

SSDs consist of one or more SLAs. In aggregate, they cover Australia (as defined in chapter 1, p. 5) without gaps or overlaps. The larger spatial units of SDs and S Dists can be formed by aggregation of SSDs (see diagram 3, chapter 1, p. 4). SSDs do not cross S/T boundaries except in the case of the Other Territories SSD, which comprises the three Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands.

In this edition of the ASGC, there are 194 SSDs in Australia.

*Delimitation of SSDs*    The delimitation criteria for SSDs are as follows:

- SSDs are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. Moreover, in the non-urban areas (i.e. outside the capital cities or areas with population clusters of 25,000 people), an SSD is characterised by identifiable links between the economic units within the region, under the unifying influence of one or more major towns or cities.
- Where possible, SSD boundaries embrace contiguous whole LGAs. However, in some cases e.g. where S Dists or capital city SDs have been defined, an SSD may split the LGA into parts with each part of the LGA forming part of the relevant SSD (e.g. the SSDs of Gold Coast City Part A and Gold Coast City Part B dissect the LGA of Gold Coast City in Queensland).
- One or more SSDs must be defined for a S Dist that falls within a S/T.

Example:

the Ballarat City SSD in Victoria covers the same area as the Ballarat S Dist.

- One or more SSDs must be defined for each part of a S Dist which straddles a S/T boundary.

Example:

the Albury SSD in New South Wales plus the Wodonga SSD in Victoria together cover the same area as the Albury-Wodonga S Dist which straddles the New South Wales and Victoria border.

- Where an SD contains a S Dist (or part of a S Dist), one or more SSDs must be defined for the S Dist and for the remainder of the SD which falls outside the S Dist even though the SSD(s) so defined may not have a predominant town or cluster of towns with a unifying socioeconomic influence over the region.

Example:

in New South Wales, the SSD of Hunter SD Bal is defined as the part of the Hunter SD which is outside the Newcastle S Dist (and Newcastle SSD).

- One Off-Shore Areas & Migratory SSD is defined for all S/Ts except the Australian Capital Territory and Other Territories.

*SSD code*    The coding conventions for SSDs are as follows:

- SSDs are identified by unique two-digit codes within SDs. Unique Australia-wide identification of SSDs is obtained by use of a five-digit code comprising S/T code (digit 1), SD code (digits 2–3) and SSD code (digits 4–5).

Example:

Albury 15505 (in New South Wales)  
Wodonga 24505 (in Victoria)

- SSD codes 88 have been reserved for special purposes (see chapter 8, p. 36).

- In the Main Structure, SSD codes are arranged in ascending numerical order within an SD. Gaps have been provided between the codes for future expansion or change.

#### Statistical Division (SD)

The SD is a general purpose spatial unit and is the largest and most stable spatial unit within each S/T in the Main Structure.

SDs consist of one or more SSDs. In aggregate, they cover Australia (as defined in chapter 1, p. 5) without gaps or overlaps. SDs aggregate to form S/Ts (see diagram 3, chapter 1, p. 4).

In this edition of the ASGC, there are 66 SDs in Australia including one SD for the three Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands.

#### Delimitation of SDs

The current basis for delimiting SDs was determined by the 31st and 33rd Conferences of Statisticians of Australia in 1969 and 1973. The delimitation criteria are as follows:

- SDs should ideally be delimited on the basis of socioeconomic criteria and should, where possible, embrace contiguous whole local government areas.
- SD boundaries so delimited should be changed only at infrequent intervals, for example, at periods of 15–20 years.
- SD boundaries should be determined in time for use in the next Population Census if practicable.
- A Capital City SD (currently one in each capital city) should be defined, after consultation with planners, to contain the anticipated development of the city for a period of at least 20 years. This fixed SD boundary — as distinct from the moving urban centre boundary — delimits an area which is stable for general statistical purposes. It represents the city in a wider sense. This delimitation procedure cannot be applied to the separate urban centres within a Capital City SD.
- SDs outside a capital city should be defined as a relatively homogeneous region characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities.

More specifically, the SDs within the individual S/T have been delimited as follows:

- In New South Wales, SDs correspond to proclaimed Government Regions with the exception that North Coast Region consists of the SDs of Richmond-Tweed and Mid-North Coast. These Regions were delimited to maximize the degree of socioeconomic interactions within each Region. Information on transport patterns, telephone traffic between major cities and towns, retail shopping, fresh goods marketing, provincial newspaper circulation areas and coverage of principal radio stations were all used in delimiting these boundaries.

- In Victoria, the SDs prior to 1995 generally corresponded to State Planning Regions adopted by the Victorian Government in October 1981. However, following the restructuring of local government in that State during 1994 and 1995, the SDs were redefined to accord with the general considerations and criteria outlined above.
- In Queensland, formal State Planning Regions have been abolished. SDs are used on an informal basis for State Government planning purposes where relevant. SD delimitation follows the general criteria outlined above.
- In South Australia, State Planning Regions, as proposed by the Committee on Uniform Regional Boundaries for Government Departments (CURB), were adopted by the South Australia Government in 1976. CURB Regions are based on such factors as: population density and distribution, socioeconomic characteristics, political boundaries, government service areas, newspaper circulation, retail trading patterns, etc. South Australia SDs do not always correspond to CURB Regions but they always aggregate to these Regions. For instance, the Adelaide SD and the Outer Adelaide SD aggregate to four CURB Regions.
- In Western Australia, State Planning Regions, as proposed by the State Statistical Coordination Committee, were adopted by the Western Australia Government in January 1976. SDs in Western Australia correspond to these Regions. The Perth Metropolitan Region is delimited to be consistent with the overall concepts and planning of Perth and to take into account LGA and CD boundaries. Rural Regions on the other hand are delimited based on the socioeconomic interest of the community; the character of natural resource; the distribution of population and industries; town size; road and railway systems; and production and marketing practices.
- In Tasmania, SD delimitation follows the general considerations and criteria outlined above. They are considered satisfactory for the purpose of State Government planning.
- In the Northern Territory, SDs are based on Territory Government Administrative Regions, and are consistent with the general considerations and criteria for their delimitation described above.
- In the Australian Capital Territory, SD delimitation follows the general considerations and criteria outlined above.
- In the Other Territories, the SD has been delimited to represent the aggregated area of the Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands.

*SD name* SD names tend to indicate their generalised region (e.g. Far North in Queensland). SD names are unique only within a S/T as a small number of SD names are replicated between the States (see example below). SD names become unique when used in conjunction with their SD codes or referenced to their respective State code. One Off-Shore Areas & Migratory SD is defined for each S/T except the Australian Capital Territory and the Other Territories.

Example:

Central West (in New South Wales and Queensland)

Northern (in New South Wales, South Australia and Tasmania)

South West (in Queensland and Western Australia)

## South Eastern (in New South Wales and Western Australia)

**SD code** The coding conventions for SDs are as follows:

- SDs are identified by unique two-digit codes within S/T. Unique Australia-wide identification of SDs requires a three-digit code comprising S/T code (digit 1) and SD code (digits 2–3).

Example:

Adelaide 405

Kimberley 545

- The SD code 85 is reserved for Off-Shore Areas & Migratory SDs and the SD code 88 has been reserved for special purposes (see chapter 8, p. 36).
- In the Main Structure, SD codes are arranged in ascending numerical order within S/T. Gaps have been provided between the codes for future expansion or change.

**State and Territory (S/T)** The S/T is the largest spatial unit in the Main Structure and in the ASGC. Six States and five Territories are recognised in the ASGC: New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, Australian Capital Territory, Jervis Bay Territory and the external territories of Christmas Island and Cocos (Keeling) Islands.

These spatial units are political entities with fixed boundaries. Except for the last three mentioned territories, the total area of each S/T, including their off-shore islands, is used for statistical purposes as a separate spatial unit in the ASGC. Jervis Bay Territory, and the Territories of Christmas Island and Cocos (Keeling) Islands are included as one spatial unit at the S/T level under the category of Other Territories.

S/Ts consist of one or more SDs. In aggregate, they cover Australia (as defined in chapter 1, p. 5) without gaps or overlaps.

**S/T code** S/Ts are identified by unique one-digit codes within Australia as follows:

Code	S/T
1	New South Wales
2	Victoria
3	Queensland
4	South Australia
5	Western Australia
6	Tasmania
7	Northern Territory
8	Australian Capital Territory
9	Other Territories

This coding order has been widely used in the ABS and other organizations as a standard, for many years. The order was reviewed when Western Australia displaced South Australia as the fourth most populous State. Citing the Commonwealth Table of Precedence, which adopted a revised listing such that any textual material having protocol significance should list Western Australia before South Australia, some users requested the code for Western Australia be changed to 4 and South Australia to 5. For the ASGC however, the above order was maintained to ensure historical continuity, to reduce potential errors in data handling and interpreting, and to avoid costs associated with changing existing systems.

## CHAPTER 3

## LOCAL GOVERNMENT AREA STRUCTURE

### PURPOSE

The LGA Structure shows the relationship between LGAs and SLAs. This relationship can be one LGA to one SLA or one LGA to many SLAs.

The LGA Structure is maintained as a separate structure from the Main Structure because:

- unlike spatial units in the Main Structure, LGAs do not cover the whole of Australia; and
- unlike SLAs which aggregate to form SSDs and SDs, some LGAs do not wholly fit within an SSD and an SD (e.g. Gold Coast City in Queensland).

### THE STRUCTURE

#### Incorporated areas only

The LGA Structure covers only incorporated areas of Australia. Incorporated areas are legally designated areas over which incorporated local governments have responsibility. The major areas of Australia not covered by incorporated bodies are the northern parts of South Australia, most of the Northern Territory and all of the Australian Capital Territory and the Other Territories.

The LGA Structure has four levels of hierarchy in Population Census years, comprising in ascending order: CDs—SLAs—LGAs—S/Ts (Incorporated Areas). In non-census years, with CDs undefined, it has only three levels of hierarchy. The spatial units in each level relate to the spatial units in other levels through aggregation or disaggregation. For example, CDs aggregate to SLAs while SLAs are disaggregates of LGAs. The spatial units within each level collectively cover only the 'incorporated' areas of Australia.

#### LGAs included in the structure

LGAs are proclaimed by various State government authorities and are gazetted throughout the year. Presently, LGAs are used as the base on which SLAs are defined for the ASGC. Because this definition process takes time, LGAs gazetted during the year leading up to an ASGC edition cannot always be processed in time for inclusion in that edition. For instance, complex LGA changes which result in complicated redesign of SLAs, or changes gazetted too close to the effective date of 1 July of an ASGC edition, may have to be included in a later edition.

*Table* The current LGA Structure, down to SLA level, is shown in the table — Alphabetic List of LGAs and SLAs within States/Territories — in chapter 12.

Example:

S/T	SD	SSD	LGA	SLA	LGA/SLA name
1			0850		Blayney (A)
1	40	05		0851	Blayney (A) - Pt A
1	40	10		0852	Blayney (A) - Pt B

Note that there is no SD or SSD code for the LGA because LGAs are not part of the Main Structure. This table also shows SLAs which cover unincorporated areas and are therefore not part of the LGA Structure.

Example:

S/T	SD	SSD	LGA	SLA	LGA/SLA name
1	60	10		8809	Unincorp. Far West

## THE SPATIAL UNITS

Census Collection District (CD) See chapter 2, pp. 8–9.

Statistical Local Area (SLA) See chapter 2, pp. 9–13.

Local Government Area (LGA) The LGA is a spatial unit which represents the whole, undivided geographical area of responsibility of either an incorporated Local Government Council, or an incorporated CGC in the Northern Territory of sufficient size and statistical significance.

An LGA consists of one or more SLAs. They aggregate directly to form the incorporated areas of S/Ts (see diagram 3, chapter 1, p. 4). In this edition of the ASGC, there are 677 LGAs. The major unincorporated areas, not covered by LGAs, are the large northern parts of South Australia, most of the Northern Territory, all of the Australian Capital Territory and the Other Territories.

*Delimitation of LGAs* The number of LGAs and their boundaries vary over time. Their creation and delimitation is the responsibility of the respective State/Territory Governments and is governed by the provision of the Local Government Acts within the particular State/Territory.

Traditionally local governments have developed around communities. The boundaries to these areas have occurred for physical reasons (i.e. rivers or roads), for socioeconomic reasons (e.g. focused around an industry) or because the government has provided infrastructure as an incentive to attract population.

More recently, with the aim of administrative efficiency, the Victorian Government has amalgamated local governments and other States are reviewing their local government structures.

*LGA types* In all States and the Northern Territory each incorporated area has an official status (expressed in a variety of ways). In this ASGC edition, the various LGA status types currently in use are:

- New South Wales: Cities(C) and Areas (A)
- Victoria: Cities (C), Rural Cities (RC), Boroughs (B) and Shires (S)
- Queensland: Cities (C), Shires (S) and Towns (T)
- South Australia: Cities (C), Rural Cities (RC), Municipalities (M) and District Councils (DC)
- Western Australia: Cities (C), Towns (T) and Shires (S)
- Tasmania: Cities (C) and Municipalities (M)
- Northern Territory: Cities (C), Towns (T), Community Government Council (CGC) and Shires

*LGA name* The naming conventions for LGAs in the ASGC are as follows:

- LGA names include a suffix which identifies the LGA's type.

Example:

Albury (C)

Onkaparinga (DC)

- With one exception, LGA names are unique across States and Territories. The LGA name Campbelltown (C), is duplicated between New South Wales and South Australia. This LGA name will become unique only when used in conjunction with its LGA code or respective State code.

*LGA code* LGAs are identified by four-digit codes as follows:

- Codes are unique only within a S/T. For unique Australia-wide LGA code identification, the four-digit code must be preceded by a unique one-digit S/T code. All LGA codes end with the digit 0.

Example:

Blayney (A) 0850 (in New South Wales) (S/T code 1)

Booringa (S) 0850 (in Queensland) (S/T code 3)

- Where an LGA corresponds to an SLA, the LGA code and the SLA code are identical.

Example:

LGA	SLA
Bathurst(C) 0450	Bathurst(C) 0450

- Where an LGA consists of more than one SLA the first three digits of LGA code and SLA code are, in most cases, identical. The 13 exceptions to this general rule are explained in special case LGA codes, below.

Example:

LGA	SLA
Latrobe (M) 3810	Latrobe (S) - Pt A 3811
	Latrobe (S) - Pt B 3812

*Special case LGA codes* When an LGA consists of many component SLAs, it becomes impossible to maintain a three-digit link between the LGA code and the SLA codes. This occurs for the LGAs of: Queensland — Brisbane (C), Gold Coast (C), Logan (C), Pine Rivers (S), Redland (S), Caboolture (S), Maroochy (S), Ipswich (C), Cairns (C), Thuringowa (C) and Townsville (C); and for the Northern Territory — Darwin (C) and Palmerston (T).

Example:

the LGA of Brisbane (C) in Queensland is split into many SLAs, including:

LGA	SLA
Brisbane (C) 1000	Acacia Ridge 1001
	Yeronga 1648
	Zillmere 1653

*State/Territory (S/T)* See chapter 2, p. 17.

## CHAPTER 4

## STATISTICAL DISTRICT STRUCTURE

### PURPOSE

The S Dist Structure maintains a list of selected, significant, predominantly urban areas in Australia which are not located within a Capital City SD (see chapter 2, p. 15). S Dists enable comparable statistics to be produced about these selected urban areas. In the main, the structure is used to report intercensal population estimates.

S Dists are maintained as a separate structure from the Main Structure because:

- the total area of S Dists does not cover the whole of Australia; and
- some S Dists straddle S/T boundaries (e.g. the Gold Coast-Tweed S Dist lies partly in Queensland and partly in New South Wales).

### THE STRUCTURE

The S Dist Structure has four levels of hierarchy in census years, comprising in ascending order: CDs–SLAs–SSDs–S Dist. In non-census years, with CDs undefined, it has only three levels of hierarchy (see diagram 3, chapter 1, p. 4).

In this structure, CDs, SLAs and SSDs are confined to those which fall within S Dists. The spatial units relate to each other through aggregation or disaggregation. For example, CDs aggregate to SLAs while SLAs are disaggregates of SSDs. The spatial units within each level of the S Dist Structure do not collectively cover the whole of Australia.

Table The current S Dist Structure, down to SLA level, is shown in the following table in chapter 12 of this manual:

#### S Dist Structure

(showing three hierarchical levels: S Dist–SSD–SLA)

#### Example:

S Dist	SSD	SLA	Name
1006			WOLLONGONG (New South Wales)
	05		<i>Wollongong</i>
		4400	Kiama (A)
		6900	Shellharbour (A)
		8450	Wollongong (C)

### THE SPATIAL UNITS

Census Collection District (CD) See chapter 2, pp. 8–9.

Statistical Local Area (SLA) See chapter 2, pp. 9–13.

Statistical Subdivision (SSD) See chapter 2, pp. 13–15.

Statistical District (S Dist) S Dists are predominantly urban areas, the boundaries of which are designed to contain the anticipated urban spread of the area for at least 20 years. They are generally defined as having a population of 25,000 or more.

S Dists consist of one or more SSDs. S Dists do not aggregate to any higher level spatial units (see diagram 3, chapter 1, p. 4).

There are 21 S Dists in this edition of the ASGC. Three of these straddle two States: Albury-Wodonga (New South Wales/Victoria), Gold Coast-Tweed (Queensland/New South Wales) and Canberra-Queanbeyan (Australian Capital Territory/New South Wales).

<i>Delimitation of S Dist</i>	<p>The criteria for delimiting S Dists are as follows:</p> <ul style="list-style-type: none"> <li>▪ S Dists consist of one or more urban centres (outside Capital City SDs) in close proximity with a population of 25,000 or more;</li> <li>▪ S Dist boundaries are defined in anticipation of urban development of at least 20 years;</li> <li>▪ S Dists consist of one or more SSDs;</li> <li>▪ S Dists may cut across LGA boundaries;</li> <li>▪ S Dists may cut across S/T boundaries; and</li> <li>▪ a S Dist may be delimited for an urban centre with less than 25,000 population, where the ABS can determine a demand for intercensal population estimates for the area and that existing LGA/SLA boundaries are inadequate for this purpose.</li> </ul>
<i>S Dist name</i>	<p>S Dist names include a suffix which identifies the State(s)/Territory in which the S Dist is located.</p> <p>Example:  Newcastle (NSW)  Albury-Wodonga (NSW/VIC)</p>
<i>S Dist code</i>	<p>S Dists are identified by four-digit codes which are unique within Australia. The first two digits indicate the S/T(s) in which the S Dist is located. For the three S Dists which cover two States, the first digit is the code of the predominant State and the second digit is the code of the other State. For the other S Dists which fall entirely within one S/T, the second digit is 0. The last two digits are allocated in ascending numerical order. Gaps are left between codes for future expansion.</p> <p>Example:  Newcastle (New South Wales) 1003  Albury-Wodonga (New South Wales/Victoria) 1218  Gold Coast-Tweed (Queensland/New South Wales) 3139  Canberra-Queanbeyan (Australian Capital Territory/New South Wales) 8196</p>

## CHAPTER 5

## STATISTICAL REGION STRUCTURE

### PURPOSE

The SR Structure has been in use since 1986, for the production of standard statistical outputs from Population Censuses and labour force surveys. The latter uses over 70 dissemination regions for the publication of labour force data.

SRs are maintained as a separate structure from the Main Structure because of the complex manner in which they relate to SSDs and SDs. For example, SRs can be whole SSDs, aggregates of SSDs, or part of an SSD. Similarly they can be whole SDs, aggregates of SDs or part of an SD. SRs can also be as large as a State or Territory. SRs are aggregates of SLAs.

### THE STRUCTURE

The SR Structure has six levels of hierarchy in census years, comprising in ascending hierarchical order of: CDs—SLAs—SRSs—SRs—MSR—S/Ts. In non-census years, with CDs undefined, it has only five levels of hierarchy (see diagram 3, chapter 1, p. 4).

The spatial units in adjoining levels relate to each other by aggregation and disaggregation. For example, SRSs aggregate to SRs while SRs are disaggregates of MSRs. The spatial units within each level of the SR Structure cover the whole of Australia (as defined in chapter 1, p. 5) without gaps or overlaps.

Table The current SR Structure is shown in the following tables in chapter 12:

- Broad Statistical Region Structure  
(showing three hierarchical levels: S/T—MSR—SR)

Example:

S/T	MSR	SR	Name
4			South Australia
	1		Adelaide
		04	Northern Adelaide
		08	Western Adelaide
		12	Eastern Adelaide
		16	Southern Adelaide

- Detailed Statistical Region Structure  
(showing five hierarchical levels: S/T—MSR—SR—SRS—SLA)

Example:

S/T	MSR	SR	SRS	SLA	Name
4					South Australia
	1				Adelaide
		04			Northern Adelaide
			1		Northern Adelaide
				1680	Elizabeth (C)
				1821	Enfield (C) - Pt A

## THE SPATIAL UNITS

Census Collection District (CD) See chapter 2, pp. 8–9.

Statistical Local Area (SLA) See chapter 2, pp. 9–13.

Statistical Region Sector (SRS) SRSs consist of one or more adjoining SLAs and in all but three cases equate to one or more adjoining SSDs.

### Example:

SRS	SSD	SLA
Mornington Peninsula	Frankston City	Frankston (C) - East Frankston (C) - West
	Mornington Peninsula Shire	Mornington P'sula (S) - East Mornington P'sula (S) - South Mornington P'sula (S) - West

The three exceptions are:

- 9 of the 17 SRSs in the Brisbane MSR are smaller than an SSD.
- South and East Moreton Balance SRS in Queensland is smaller than an SSD. It equates with the SLA of Beaudesert (S) - Pt B; and
- North and West Moreton SRS in Queensland equates with two SSDs minus the SLA of Beaudesert (S) - Pt B.

Although SRSs are subdivisions of SRs, most SRSs equate with SRs. Exceptions to this generalised rule include the SRSs in the Hunter, Illawarra, Mackay-Fitzroy-Central West, Northern-North West, South and East Moreton, Darling Downs-South West, Tasmania and Northern Territory SRs and the SRSs in the Brisbane MSR. SRSs are used primarily for disseminating selected Population Census and labour force statistics. SRSs have also been used to present a range of regional statistics not incorporated in the Main Structure.

### Example:

SR	SRS
Brisbane City Inner Ring	City Core Northern Inner Eastern Inner Southern Inner Western Inner
Brisbane City Outer Ring	Northern Outer Eastern Outer Southern Outer Western Outer

There are 88 SRSs in this edition of the ASGC.

**SRS code** SRSs are identified by five-digit codes. Each code consists of S/T code (digit 1), MSR (digit 2), SR code (digits 3–4) and SRS code (digit 5).

**Example:**

Mornington Peninsula (21281)

Only digits 1, 3–4 and 5 are required for unique identification within Australia.

**Statistical Region (SR)** SRs consist of one or more adjoining SSDs in all but three cases.

The three exceptions are:

- Brisbane City Inner Ring SR and the Brisbane City Outer Ring SR are smaller than an SSD. Collectively they form the Brisbane City SSD;
- South and East Moreton SR comprises one SSD plus the SLA of Beaudesert (S) - Pt B; and
- North and West Moreton SR equates with two SSDs minus the SLA of Beaudesert (S) - Pt B.

In the capital cities of the five larger States of New South Wales, Victoria, Queensland, South Australia and Western Australia, SRs are smaller than SDs and aggregate to form the respective Capital City SDs. Outside of the capital cities in these S/Ts, SRs consist of one or more adjoining SDs.

In Tasmania, Northern Territory, Australian Capital Territory and Other Territories, SRs are the entire S/Ts.

There are 65 SRs in this edition of the ASGC.

**SR code** SRs are identified by four-digit codes as follows:

- Each code consists of S/T code (digit 1), MSR (digit 2) and SR code (digits 3–4).

**Example:**

South and Eastern Moreton 3964

Gosford-Wyong 1156

- The SR code 98 has been reserved for special purposes (see chapter 8, p. 36).

**Major Statistical Region (MSR)** Each of the five larger States of New South Wales, Victoria, Queensland, South Australia and Western Australia consists of two MSRs. One MSR equates with the Capital City SD and the other with the balance of the State. The other S/Ts have one MSR each with each MSR covering the entire area of a S/T.

There are 14 MSRs in this edition of the ASGC.

*MSR code*      MSRs are identified by two-digit codes for unique identification within Australia. Each code consists of a S/T code (digit 1) and a MSR code (digit 2). Code 9 denotes the Balance of State MSR.

**Example:**

MSR

Sydney 11

Balance of New South Wales 19

*Delimitation of MSR, SR, SRS*      One of the main uses of these spatial units is to report statistics from the labour force surveys. In delimiting these spatial units it is necessary to consider the population size of proposed spatial units and the size of the sample to be used to estimate these populations. It is necessary to determine whether the population and sample sizes will be sufficiently large to yield reliable estimates.

Population considerations dictate that Tasmania, Northern Territory, Australian Capital Territory and Other Territories cannot be dissected into two MSRs (as in the other States) as their populations are too small. Population considerations also delimit the smaller spatial unit sizes in this structure i.e. the SRs and SRSs.

The minimum population size for the publication of labour force statistics depends on the labour force survey sample sizes for each State. In New South Wales in 1996, a population of 367,000 is the minimum to form a publishable region. In other S/Ts this figure is lower as the fraction of the population sampled in these S/Ts is larger. Sometimes it is necessary to aggregate sample results from smaller SRs into larger spatial units or to split the larger SRs into the finer units of SRSs, to ensure publication of sufficiently reliable estimates from the labour force surveys.

*State/Territory (S/T)*      See chapter 2, p. 17.

## CHAPTER 6

## URBAN CENTRE/LOCALITY STRUCTURE

### PURPOSE

The UC/L Structure groups CDs together to form defined areas according to population size criteria. The resulting areas are known as Urban Centres or Localities. Population counts (place of enumeration) from the latest Census of Population and Housing are used to define the UC/L Structure which means this classification structure is only current at the time of the Census. Both the Urban Centre and the Locality spatial units are made up of one or more contiguous CDs. As the UC/L Structure relates to CDs within defined areas only, the Structure, in aggregate, does not cover all of Australia.

The UC/L Structure is used for the production of standard ABS statistical outputs from Population Censuses such as *Census Counts for Small Areas* (2730.0) and *CDA96* (2019.0).

The UC/L Structure is separate from the Main Structure because:

- the boundaries are generally inconsistent with SLAs and the higher level spatial units in the Main Structure; and
- its total area covers only part of Australia.

### THE STRUCTURE

The UC/L Structure is defined at Population Census times only. It has three hierarchical levels, comprising in ascending hierarchical order: CDs–Urban Centres/Localities–S/Ts (see diagram 3, chapter 1, p. 4).

CDs within this structure are confined to those within defined Urban Centre and Locality boundaries. As a consequence, Urban Centres and Localities aggregate to cover only part of a State or Territory and thus the structure covers part of Australia only.

Table Urban Centres and Localities are delimited by the use of actual population counts after each census is conducted. This means that while the other ASGC structures can be finalised and reported in the ASGC manual with an effective date of 1 July, the UC/L Structure can only be reported after population counts are available, usually in the year following the census. This is done via a separate publication entitled *Statistical Geography: Volume 3 — Australian Standard Geographical Classification (ASGC) Urban Centres/Localities* (2909.0) (showing only the top two hierarchical levels: S/Ts–Urban Centres/Localities).

Example:

S/T	Urban Centre/Locality
	Code
1	New South Wales
	00200 Aberdeen
	00400 Adaminaby (L)

In this table, Urban Centre and Locality names are alphabetically listed and UC/L codes are arranged in ascending numerical order within each S/T. An (L) is shown after Locality names to distinguish Localities from Urban Centres.

Listings of component CDs of Urban Centres and Localities will be available through all ABS offices.

## THE SPATIAL UNITS

Census Collection District (CD) See chapter 2, pp. 8–9.

Urban Centre/Locality In broad terms, an Urban Centre is a population cluster of 1,000 or more people while a Locality is a population cluster of between 200 and 999 people. For statistical purposes, people living in Urban Centres are classified as urban while those in Localities are classified as rural.

Each Urban Centre/Locality has a clearly defined boundary and comprises one or more whole CDs.

*Delimitation of Urban Centres and Localities* The delimitation criteria for UC/Ls are based on those developed in 1965 by Dr G.J.R. Linge from the Australian National University. The criteria that are currently in force have been adopted and subsequently amended by the Conference of Statisticians of Australia in 1965 and 1969 and the Review of ABS Statistical Geography in 1988.

The criteria are as follows:

- Each Urban Centre with a population of 20,000 or more is to consist of a cluster of contiguous urban CDs and other urban areas. CDs classified as urban include the following:
  - All contiguous CDs which have a population density of 200 or more persons per square kilometre shall be classified as urban. Consequently State, SD, LGA and other administrative boundaries shall be disregarded in determining whether a CD should be included within the Urban Centre.
  - A CD consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with CDs which are themselves urban.
  - A CD consisting mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by CDs which are themselves classified as urban.
  - Any area which is completely surrounded by CDs which are urban must itself be classified as urban.
  - Where an Urban Centre of 20,000 or more population is separated from another urban area by a gap in urban development of less than three kilometres (by the shortest railway or road distance), the gap shall be bridged by classifying a connecting CD as urban, and therefore treating the urban areas as one. If the gap is three or more kilometres (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban areas shall remain separate.
  - Any area included in an Urban Centre in 1971 or thereafter under the provisions of these criteria shall continue to be so included, unless the population of the Urban Centre falls below 20,000, in which case these criteria will cease to apply.

- If a CD was incorrectly included (for whatever reason) in a Linge area at a previous census, then it should be excluded at the next census unless it now meets the criteria.
- Large peripheral CDs in growth areas may be fragmented; and insofar as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible, contain at least 100 persons at the next census and be of such a size that they will contain a collector's workload when fully developed. For the purpose of delimiting Urban Centres such fragments shall be regarded as CDs.
- Each Urban Centre with a population between 1,000 and 19,999 is to be delimited as follows:
  - The Urban Centre shall be delimited subjectively by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available.
  - All contiguous urban growth is to be included (even if this would not necessarily occur if the density criterion were applied), together with any close but non-continuous development which could be clearly regarded as part of the Urban Centre. However, for urban centres which contain a population approaching 20,000 the objective criteria applied for urban centres with 20,000 people should also be considered.
- Localities are to be delimited as follows:
  - All population clusters of less than 1,000 population and whose population is expected to reach 200 by the next census are to be examined for boundary delineation.
  - The following criteria must be satisfied before a boundary is drawn around a Locality. It must:
    - ♦ contain a non-farm population of at least 200 people but not more than 999 by the next census;
    - ♦ have a minimum of 40 occupied non-farm dwellings with a discernible urban street pattern; and
    - ♦ have a discernible nucleus of population.
  - If there is some doubt that a Locality will reach the minimum population of 200 people then a boundary should still be drawn around the Locality.
  - Where, in the case of defence camps, construction camps, etc. it is anticipated that the cluster will not exist at two consecutive censuses, these camps should not be bounded.
  - The Localities shall be delimited subjectively, by the use of the latest available aerial photographs, by field inspection and/or by consideration of any other information that is available.

<i>Subjective guidelines</i>	<p>Guidelines for the drawing of subjectively determined UC/L boundaries are as follows:</p> <ul style="list-style-type: none"> <li>▪ Wide rather than narrow boundaries are to be used to ensure inclusion of all urban or built-up areas. Some rural area can be included in an Urban Centre, if necessary, to ensure that the boundary encompasses all the urban area. However, this guideline should be interpreted in the light of the ones that follow.</li> <li>▪ Continuity of urban development is a major consideration. Boundaries are not to be thrown very wide just to include some small non-contiguous area or urban development. (The Linge criterion of 3 kilometres may be of assistance in this respect in larger Urban Centres of say greater than 10,000–15,000 population.)</li> <li>▪ Where the subjective boundaries decided upon are contained within a municipal boundary and the remaining area or population is small, the municipal boundary is to be used.</li> <li>▪ For previously bounded cities, towns or localities the boundaries are not to be changed lightly. Comparability is to be maintained with the past unless there are significant exclusions (either due to faulty boundaries at the previous census or subsequent development).</li> <li>▪ When considering urban land usage, recognition should be given to approved plans.</li> <li>▪ Topographic boundaries must be used wherever possible when they are consistent with the above guidelines.</li> </ul>
<i>UC/L name and code</i>	<p>When Urban Centres cross S/T boundaries, the separate portions of the Urban Centre are uniquely identified and reported in their relevant S/T.</p> <p>UC/Ls are identified by a five-digit code which is only unique within each State/Territory. Use of UC/L codes in conjunction with S/T codes, is necessary before these codes become unique across Australia.</p> <p>The codes 00000 and 99999 are reserved as Rural Balance and Off-Shore and Migratory codes, respectively, for each S/T.</p> <p>Example:  New South Wales (S/T code 1)  00200 Aberdeen  00400 Adaminaby (L)  00800 Albury-Wodonga (Albury Part)</p>
<i>State/Territory (S/T)</i>	See chapter 2, p. 17.

## CHAPTER 7

## SECTION OF STATE STRUCTURE

### PURPOSE

The SOS Structure is the final classification structure listed in the ASGC (see diagram 3, chapter 1, p. 4). Like the UC/L Structure (chapter 6, pp. 28–31), the SOS Structure uses population counts from the latest Census of Population and Housing to define CDs between urban and rural. Unlike the UC/L Structure, the SOS Structure relates to all CDs and therefore, in aggregate, the SOS Structure covers all of Australia (as defined in chapter 1, p. 5). There are five different SOS in this classification, with each SOS made up of geographical areas of a particular type within the S/T.

The SOS Structure is used for the production of standard statistical outputs from Population Censuses such as *Census Counts for Small Areas* (2730.0) and *CDATA96* (2019.0). It is also used to classify data collected from the labour force surveys.

The SOS Structure is maintained as a separate structure in the ASGC because SOS spatial units do not align with spatial units from any of the other structures.

### THE STRUCTURE

The SOS Structure is defined only in census years. It contains three hierarchical levels, comprising in ascending hierarchical order of CDs–SOSs–S/Ts.

In this structure, CDs aggregate to SOSs and SOSs aggregate to S/Ts without gaps or overlaps. Consequently, the structure covers all of Australia.

Table The current SOS Structure is shown in the following tables in chapter 12:

- Section of State Structure: States/Territories, Sections of State (showing only the top two hierarchical levels: S/T–SOS)

Example:

S/T SOS

1	New South Wales
0	Major Urban
1	Other Urban
2	Bounded Locality
3	Rural Balance
4	Migratory

Listings of component CDs of SOSs, for census year 1996, will be available from the ABS as a Customised Geographic Data Report.

### THE SPATIAL UNITS

Census Collection District (CD) See chapter 2, pp. 8–9.

Sections of State (SOS) Within a State or Territory, each SOS represents an aggregation of non-contiguous geographical areas of a particular urban/rural type. The five categories are:

- Major Urban: urban areas (Urban Centres in the UC/L Structure) with a population of 100,000 and over;

- Other Urban: urban areas (Urban Centres in the UC/L Structure) with a population of 1,000 to 99,999;
- Bounded Locality: rural areas (Localities in the UC/L Structure) with a population of 200 to 999;
- Rural Balance: the remainder of the S/T; and
- Migratory: areas composed of off-shore, shipping and migratory CDs see chapter 2, p. 9.

SOS code      SOSs are identified by unique one-digit codes within each State/Territory. For unique Australia-wide identification, each SOS code has to be used in conjunction with the S/T code.

State/Territory (S/T)      See chapter 2, p. 17.

## CHAPTER 8

## SPECIAL PURPOSE ASGC CODES

### PURPOSE

To allow data to be coded when only incomplete locational information is available, a series of special purpose codes has been created for each hierarchical level within the ASGC's Main Structure and for SRs within the SR Structure. These codes are used when people provide limited address details or have no fixed place of abode.

Special purpose codes enable data to be coded to the broadest hierarchical level reported. For example, a reported address may be sufficiently detailed to allow it to be coded to a Capital City SD within a S/T, even though it cannot be coded to an SSD within that Capital City SD.

Coding data to a higher level unit in a hierarchical classification without also coding it to the lower levels would cause the data value for the higher unit to no longer equal the sum of data values for the lower units. Special purpose (i.e. dummy area) codes have therefore been created for each hierarchical level in the Main Structure and for SRs within the SR Structure, to which geographically undefined data can be classified.

### MAIN STRUCTURE

In the Main Structure, special purpose codes relate to, in ascending hierarchical order: SLAs, SSDs, SDs and S/Ts.

#### Special purpose SLA codes

Four-digit SLA codes ending with 99 are reserved for coding undefined area data to SLA level. The first two digits of undefined SLA codes are normally in the range 00-89.

Example:

0199 Inner Sydney Undefined  
2799 Gosford-Wyong Undefined

These codes are used in the following cases:

- Data required to be coded at SLA level but only able to be coded at SSD level, is coded to the undefined SLA within the defined SSD.

Example:

SD	SSD	SLA
05		Sydney
	70	Gosford-Wyong
	2799	Gosford-Wyong Undefined

- Data required to be coded at SLA level but only able to be coded at SD level, is coded to the undefined SLA of the undefined SSD (see chapter 8, p. 36) within the defined SD.

Example:

SD	SSD	SLA
05		Sydney
	88	Sydney Undefined
	0099	Sydney Undefined

A number of SLA codes within the range 0099–9999 are reserved for specific applications. These are:

- Code 0099, is reserved for the undefined SLA in each Capital City SD.

Example:

S/T	SD	SSD	SLA	
1	05	88	0099	Undefined Sydney

- Code 9899, is reserved for the undefined SLA within an undefined SD, within a defined S/T. For example, when data is required to be coded at SLA level but is only able to be coded at the S/T level, it is coded to SLA 9899.

Example:

S/T	SD	SSD	SLA	
1	88	88	9899	Undefined New South Wales
8	88	88	9889	Undefined Australian Capital Territory

- Code 9099, is reserved for the undefined SLA within an undefined SD, within an undefined S/T (see next page). For example, when data is required to be coded at SLA level but is only able to be coded at the Australia level, it is coded to SLA 9099. This code is used to code Population Census data when usual residence information is not stated.

Example:

S/T	SD	SSD	SLA	
0	88	88	9099	Undefined S/T, Not Stated for census purposes

- Code 9199, is used in 'usual residence' and similarly worded coding where the information is not applicable (e.g. children who had not been born five years ago).

Example:

S/T	SD	SSD	SLA	
1	88	88	9199	Not Applicable, New South Wales

- Code 9299, is used in usual residence and similarly worded coding when the data relates to overseas.

Example:

S/T	SD	SSD	SLA	
3	88	88	9299	Overseas, Queensland

- Code 9399, is used as a dummy LGA to enable S/T totals to be produced for some LGA output from the Censuses of Population and Housing. In such circumstances, code 9399 equates to the aggregated unincorporated SLAs in each S/T.

Example:

S/T	LGA	
7	9399	Aggregation of unincorporated SLAs, Northern Territory

- Code 9499, is used for persons with no fixed place of abode, including children in care, persons in prison etc.

Example:

S/T SD SSD SLA

4 88 88 9499 No fixed abode, South Australia

Special purpose SD and  
SSD codes

The two-digit code 88 is reserved for coding undefined area data to SSD and SD levels. A dummy SD, with an SD code of 88, exists for every S/T in the Main Structure, except Other Territories. Similarly there is a dummy SSD for every SD, except for Other Territories.

Example:

S/T SD SSD

1			New South Wales
	88		New South Wales Undefined
	05		Sydney
		88	Sydney Undefined

Special purpose S/T code

Data is coded to Undefined S/T when address details specify Australia only (i.e. without S/T details). The S/T code for Undefined S/T is 0. This code is also used to code Population Census data when usual residence is not stated.

Example:

S/T SD SSD SLA

0 88 88 9099 Undefined S/T or for Population Census  
purposes—Not stated

STATISTICAL REGION  
STRUCTURE

In the SR Structure, special purpose codes relate to SLAs, SRs and S/Ts.

Special purpose SLA codes

See chapter 8, pp. 34–36.

Special purpose SR codes

In New South Wales, Victoria, Queensland, South Australia and Western Australia, the two-digit code 98 is reserved for coding undefined area data to the SR level.

Example:

S/T SR SLA

5 98 9899 Undefined Western Australia

In the remaining S/Ts (Tasmania, Northern Territory, Australian Capital Territory, Other Territories) there is only one SR, so undefined SR level data is coded to an undefined SLA within each S/T's one defined SR (code 04).

Example:

S/T SR SLA

8 04 9899 Undefined Australian Capital Territory

Special purpose S/T code

See Special purpose S/T code above.

The ASGC was created to allow spatially comparable statistics to be collected and published by the ABS. However, this objective can only be achieved if the ASGC is consistently applied across all statistical work. The following publishing guidelines are therefore used in the ABS:

- Where possible, each table relates to one particular ASGC structure only. This structure is identified in the table heading or a table footnote.
- Where possible, the ASGC structure is represented in full. Omissions of one or more hierarchical levels in one structure are however, permissible. For example, the entire CD level or entire SSD level of the Main Structure may be omitted. All omissions are noted and explained in the publication.
- Partial omissions from an ASGC structure may also be necessary because of confidentiality considerations. When ASGC spatial units have to be combined, the combinations are confined to spatial units which are:
  - within one ASGC structure;
  - at the same hierarchical level; and
  - within one spatial unit at the next hierarchical level.

Example:

in the Main Structure, two or more SLAs within an SSD  
or, two or more SSDs within an SD.

- In certain circumstances it is permissible in one table, to publish statistics which relate to more than one ASGC structure, for example, if statistics are required on LGAs and SDs. Extreme care is required, however, to ensure the statistics being cross-classified cover the same total area. For example, in some States and the Northern Territory, LGAs cover only part of the S/T, while SDs cover the entire S/T. A cross-classification of LGAs within SDs would therefore not be feasible if S/T totals were required. In this case, use of the Main Structure or the SR Structure would be more appropriate.
- ASGC spatial unit names are shown in table stubs or column headings. These should conform with those in the ASGC or authorised ASGC subsets.
- Each file, document or publication containing statistics classified according to the ASGC specifies the applicable ASGC edition. This is necessary to ensure users can compare like areas across different collections.
- Care should be taken in publishing ASGC spatial unit codes. In publications containing combined national, S/T data, ASGC spatial unit codes are quoted in conjunction with spatial unit names or prefixed by S/T codes to allow unique identification throughout Australia.

## CONTACT DETAILS

For further information about these publication guidelines please contact the Assistant Director, Area Classification, Australian Bureau of Statistics, Canberra on telephone (06) 252 5888.

The first edition of the ASGC manual had an effective date of 5 July 1984 and adopted the geographical areas already in use in the ABS for some time prior to that date. In 1988, the ASGC underwent a review and most of the findings were incorporated into the 1991 edition of the ASGC. A further review of the ASGC commenced in early 1996.

Prior to 1993, the ASGC manual was updated on an as-needed basis which generally resulted in updates occurring once or twice a year. Since 1994, the ASGC manual has been updated annually with an effective date of 1 July. The nine editions of the ASGC manual between 1984 and 1990, were known as Edition 1 to Edition 9. By contrast, the five editions between 1991 and 1995, were known as Edition 2.1 to Edition 2.5. From 1996, the ASGC edition will be known by the year it becomes effective, i.e. the 1996 Edition.

The 1996 Edition is being published as part of a three-volume set of Statistical Geography publications relating to the 1996 Census. Previous editions of the ASGC manual were kept up-to-date by the issue of replacement pages. Editions 1 to 9, formed one series of editions. Similarly, Edition 2.1 was the base edition of the second series of ASGC manuals, which included Editions 2.1 to 2.5.

#### SPATIAL UNIT AND CODE CHANGES

Essentially, the ASGC is updated in response to two types of changes:

- Externally controlled spatial unit changes. These changes relate to administrative or political areas which have been adopted as spatial units in the ASGC. The ABS has no control over changes to these types of spatial units. The most usual changes of this type are changes to LGAs made by State and Territory Governments. These changes can range from LGA boundary variations to the creation or amalgamation of whole LGAs and usually require consequential changes to related ASGC spatial units such as SLAs.
- All other changes. These cover changes to ABS-defined spatial units, such as SLAs created within LGAs or changes to SSD boundaries, or changes to the principles and criteria which govern the delimitation of these spatial units. On occasion, changes of this type are triggered by changes to administrative or political areas described above. More usually, changes of this type result from ad hoc or systematic reviews.

Changes in spatial units are often, though not always, accompanied by changes to the spatial unit codes. Therefore it is important when referencing spatial units in publications or tabulations, to quote the ASGC edition as well as the names and codes of these units. The main causes of spatial unit code changes between ASGC editions are:

- changes to spatial unit areas, especially where changes are significant;
- spatial unit name changes, especially in the case of LGAs and SLAs;
- consequential changes i.e. where one change forces another; and
- general code structure revisions.

Coordination of ASGC  
maintenance

Maintenance of the ASGC and ASGC-related material and products is shared by a number of projects within the ABS Central and State Offices. It is coordinated by Geography Section which also has responsibility for the ASGC manual and the National Localities Index (chapter 11, p. 40) as well as providing assistance to users.

The ASGC manual is essentially a reference document. Consequently, additional and more specialised ASGC-related material and products are needed to assist application of the ASGC to statistical work. Many of these materials and products are available for sale to ABS clients as well as for use by ABS personnel. The following is a listing of some of the more important types of related material and products.

#### ASGC-RELATED PRODUCTS AND SERVICES

**National Localities Index (NLI)** The NLI is a street address coding system which supplements the ASGC. The NLI allows reported street address data to be readily converted into ASGC classification codes. The NLI contains a list of all localities in Australia. In broad terms, localities are places where people can reside or conduct business. Localities are assigned a postcode and their full ASGC code (i.e. S/T, SD, SSD and SLA codes). Where a locality is split between two or more SLAs, the NLI is augmented by a streets index. The NLI is updated and maintained in accordance with each edition of the ASGC.

The NLI is held and maintained on the ABS mainframe computer system and is available on various recording media (e.g. magnetic tape or floppy disk) as either simple data files or incorporated into computer-assisted coding software. The NLI is available by S/T or for the whole of Australia.

**Maps and digital boundaries** Maps depicting the census editions of the ASGC were included in 1986 and 1991 Census publications. Since 1991, copies of digitised ASGC boundaries have been produced for each edition of the ASGC. Digitised boundaries for the census years of 1986 (ASGC Ed. 3), 1991 (ASGC Ed. 2.1) and 1996 (1996 Edition) are also available. In response to user demand, ASGC maps of the Main Structure are included in this volume.

**Labels and codes** Listings of ASGC labels and codes are available for all structures and all editions of the ASGC. These listings are available on floppy disk in a variety of storage formats. The standard format is ASCII comma delimited text file.

**Conversion listings and concordances** To assist users of the ASGC, Geography Section has developed a number of conversion listings (concordance files) to enhance comparability of data. These concordances are available on floppy disk in a variety of storage formats. The standard format is ASCII comma delimited text file with a maximum field length of 54 characters. Concordance files are available by S/T or for the whole of Australia.

The concordances currently available include:

- 1996 CD to 1996 SLAs
- Census 86 SLA Codes/Census 91 SLA Codes  
A concordance incorporating all area/code changes to SLAs between the 1986 and 1991 Censuses of Population and Housing.

A similar concordance is being produced for Census 91 SLA codes to and from Census 96 SLA Codes.

- **Postcode to ASGC Edition 1996 Concordance**  
Concordance files will be available in 1997 for converting postal area (CD-derived postcodes) data to and from the ASGC 1996 Edition.
- **Other Geographic Concordances**  
A variety of concordances are available for converting data to and from official boundaries, such as the boundaries of: Commonwealth Electoral Division; State Electoral Division; Commonwealth Employment Services; Aboriginal and Torres Strait Islander Commission; Department of Primary Industries and Energy's and Department of Human Services and Health's 1991 Rural, Remote and Metropolitan Areas Classification; New South Wales Health; and National Office of Local Government.
- **Customised Concordances**  
Concordances between ASGC spatial units, postcodes and other geographical units can be tailored to individual user requirements.

#### CONTACT DETAILS

For further information on any of these ASGC-related materials and products, please contact the Assistant Director, Area Classification, Australian Bureau of Statistics, Canberra on telephone (06) 252 5888 or facsimile (06) 252 7788.

## APPENDIX 3

## CHANGES TO GEOGRAPHICAL AREAS 1991-1996

### CHANGES TO GEOGRAPHICAL AREAS 1991-1996 NEW SOUTH WALES

#### STATISTICAL DIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Central West	Reduced by transfer of part of Cabonne (S) - Pt C to North Western	1-7-93
Hunter	Addition of reclaimed land to Lake Macquarie (C)	1-7-93
Mid-North Coast	Reduced by transfer of part of Nymboida (A) to Northern	1-7-96
North Western	Enlarged to include part of Gunnedah (S) from Northern and part of Cabonne (S) - Pt C from Central West	1-7-93
Northern	Reduced by transfer of part of Gunnedah (S) to North Western	1-7-93
	Enlarged by transfer of part of Nymboida (A) from Mid-North Coast	1-7-96

#### STATISTICAL SUBDIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Albury	Reduced by transfer of part of Hume (S) to Upper Murray (excl. Albury)	1-7-93
	Reduced by transfer of part of Hume (A) to Upper Murray (excl. Albury)	1-7-94
Central Macquarie	Enlarged to include part of Gunnedah (S) from Northern Slopes, and part of Cabonne (S) - Pt C from Lachlan	1-7-93
Central Western Sydney	Reduced by transfer of part of Auburn (M) to Inner Western Sydney;	1-7-93
Sydney	enlarged to include part of Strathfield (M) from Inner Western	
Clarence	Reduced by transfer of part of Nymboida (A) to Northern Tablelands	1-7-96
Eastern Suburbs	Reduced by transfer of part of Randwick (C) to Inner Sydney;	1-7-96
	enlarged to include part of South Sydney (C) from Inner Sydney	
Inner Sydney	Reduced by transfer of part of South Sydney (C) to Eastern Suburbs;	1-7-96
	enlarged to include part of Randwick (C) from Eastern Suburbs	
Inner Western Sydney	Reduced by transfer of part of Strathfield (M) to Central Western Sydney;	1-7-93
	enlarged to include part of Auburn (M) from Central Western Sydney	
Lachlan	Reduced by transfer of part of Cabonne (S) - Pt C to Central Macquarie	1-7-93
Manly-Warringah	Renamed Northern Beaches	1-7-92
Newcastle	Addition of reclaimed land to Lake Macquarie (C)	1-7-93
Northern Beaches	Renamed from Manly-Warringah	1-7-92
North Central Plain	Reduced by transfer of part of Moree Plains (S) and part of Narrabri (S) to Northern Slopes	1-7-93
Northern Slopes	Reduced by transfer of part of Nundle (S) to Northern Tablelands	1-7-92
	Reduced by transfer of part of Gunnedah (S) to Central Macquarie, and part of Nundle (S) to Northern Tablelands. Enlarged to include part of Moree Plains (S) and part of Narrabri (S) from North Central Plain	1-7-93
Northern Tablelands	Enlarged to include part of Nundle (S) from Northern Slopes	1-7-92
	Enlarged to include part of Nundle (S) from Northern Slopes	1-7-93
	Enlarged to include part of Nymboida (A) from Clarence	1-7-96

Queanbeyan	Enlarged to include part of Yarrowlumla (A) from Southern Tablelands (excl. Queanbeyan)	1-7-95
	Enlarged to include Yarrowlumla (A) - Pt A from Southern Tablelands (excl. Queanbeyan)	1-7-96
Southern Tablelands (excl. Queanbeyan)	Reduced by transfer of part of Yarrowlumla (A) to Queanbeyan	1-7-95
	Reduced by transfer of Yarrowlumla (A) - Pt A to Queanbeyan	1-7-96
Upper Murray (excl. Albury)	Enlarged to include part of Hume (S) from Albury	1-7-93
	Enlarged to include part of Hume (A) from Albury	1-7-94

## STATISTICAL DISTRICT

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Albury-Wodonga (NSW/VIC)	Boundary adjustments to Victorian part: Minor boundary adjustment to include a small part transferred from Bright (S) to Yackandandah (S)	1-7-92
	The southern boundary was aligned with the boundary of Indigo (S), resulting in a reduction in area	1-7-95
Canberra-Queanbeyan (ACT/NSW)	Enlarged to include part transferred from Yarrowlumla (A) to Queanbeyan (C) (1722ha)	1-7-95
	Enlarged to include Yarrowlumla (A) - Pt A	1-7-96
Gold Coast-Tweed (QLD/NSW)	Minor boundary adjustment to Queensland part to include small parts from Beaudesert (S) - Pt B and exclude a small part of Albert (S) - Pt B Bal	1-7-95

## STATISTICAL LOCAL AREA

Note: in New South Wales, the *Local Government Act 1993 No. 30* introduced on 1 July 1993 provided that all local government areas would be constituted as 'areas' with a council being constituted to manage each 'area'.

Under the provisions of that Act, an area may be proclaimed a city. There is no provision for the constitution of areas as shires or municipalities.

As a result, all LGAs/SLAs in New South Wales which were previously shires or municipalities, are now areas. This change was reflected in the ASGC from 1 July 1994 by the new abbreviation (A) in the LGA/SLA name, in lieu of the previous (S) or (M).

<i>Area</i>	<i>Nature of change</i>	<i>Approx. change in area (ha)</i>	<i>Date of change to ASGC</i>
Auburn (M)	Gained from Strathfield (M)	+41	1-7-93

	Split into 2 SLAs: Yarrowlumla (A) - Pt A and Yarrowlumla (A) - Pt B		1-7-96
Yarrowlumla (A) - Pt A	Created from part of Yarrowlumla (A)		1-7-96

Yarrowlunla (A) - Pt B	Created from part of Yarrowlunla (A)		1-7-96
Yass (S)	Lost to Harden (S)	-8	1-7-92

# CHANGES TO GEOGRAPHICAL AREAS 1991-1996 VICTORIA

## STATISTICAL DIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Barwon	Reduced by transfer of minor part of Otway (S) to Western District Enlarged to include Southern Rural (S) - West from Central Highlands; minor adjustments with Western District	1-7-93 1-7-95
Central Highlands	Reduced by transfer of Southern Rural (S) - West to Barwon, and part of Talbot & Clunes (S) to Loddon; enlarged to include part of Kyneton (S) from Loddon-Campaspe. Minor adjustments with Melbourne and Wimmera	1-7-95
East Gippsland	Reduced by transfer of small part of Ormeo (S) to Ovens-Murray; enlarged to include Alberton (S) and part of Rosedale (S) from Gippsland	1-7-95
Gippsland	Reduced by transfer of Alberton (S) and part of Rosedale (S) to East Gippsland; enlarged to include a small part of Cranbourne (C) from Melbourne	1-7-95
Goulburn	Reduced by transfer of a small part of Benalla (S) to Ovens-Murray; enlarged to include part of Eltham (S), part of Whittlesea (C), and part of Healesville (S) from Melbourne; Pyalong (S), Echuca (C), Rochester (S), a small part of Cohuna (S), a small part of Gordon (S), and parts of McIvor (S) from Loddon-Campaspe; and the major part of Yarrawonga (S) from Ovens-Murray	1-7-95
Loddon	See Loddon-Campaspe	1-7-95
Loddon-Campaspe	Reduced by transfer of Charlton (S) and the major part of Cohuna (S) to Mallee; Pyalong (S), Echuca (C), Rochester (S) a small part of Cohuna (S), a small part of Gordon (S) and parts of McIvor (S) to Goulburn; part of Kyneton (S) to Central Highlands. Enlarged to include part of Talbot & Clunes (S) from Central Highlands. Renamed Loddon	1-7-95
Mallee	Reduced by transfer of Karkarooc (S) to Wimmera; enlarged to include Charlton (S) and the major part of Cohuna (S) from Loddon-Campaspe; the major part of Donald (S) and a small part of Kara Kara (S) from Wimmera	1-7-95
Melbourne	Minor boundary adjustment to exclude small parts of the following SLAs: Werribee (C) (to Central Highlands), Eltham (S), Healesville (S) and Whittlesea (C) (to Goulburn), and Cranbourne (C) (to Gippsland)	1-7-95
Ovens-Murray	Reduced by transfer of major part of Yarrawonga (S) to Goulburn Enlarged to include part of Benalla (S) from Goulburn, and a small part of Ormeo (S) from East Gippsland	1-7-95
Western District	Enlarged to include minor part of Otway (S) from Barwon Reduced by transfer of part of Glenelg (S) to Wimmera. Other minor adjustments with Barwon and Wimmera	1-7-93 1-7-95
Wimmera	Enlarged to include Karkarooc (S) from Mallee; part of Glenelg (S) from Western District. Reduced by transfer of most of Donald (S) to Mallee. Other minor adjustments with Mallee, Western District and Central Highlands.	1-7-95

## STATISTICAL SUBDIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Ballarat	Enlarged to include Ballarat (S) - Pt B and part of Ripon (S) from West Central Highlands; and part of Buninyong (S) - Pt B from East Central Highlands. Reduced by transfer of part of Bungaree (S) - Pt A and part of Buninyong (S) - Pt A to East Central Highlands; and part of Grenville (S) - Pt A and part of Buninyong (S) - Pt A to West Central Highlands. Renamed Ballarat City	1-7-94

Ballarat City	See Ballarat	1-7-94
Bendigo	Renamed to Greater Bendigo City Part A (See Greater Bendigo City Part A)	1-7-94
Boroondara City	Renamed from Eastern Inner Melbourne	1-7-95
Central Loddon-Campaspe	Abolished. Lost Castlemaine (C), Gr. Bendigo (C) - Huntly Bal, Gr. Bendigo (C) - S'saye Bal, Maryborough (C), Newstead (S), Bet Bet (S), Gr. Bendigo (C) - Marong Bal, Maldon (S), Metcalfe (S), Tullaroop (S) and part of Melvor (S) to North Loddon; parts of Melvor (S) to South Goulburn and South West Goulburn	1-7-95
Central Melbourne	Enlarged to include part of Brunswick (C) from Northern Inner Melbourne	1-7-93
	Enlarged to include part of Essendon (C) from Western Inner Melbourne; reduced by transfer of part of Melbourne (C) - Remainder to Western Inner Melbourne. (overall area reduced.)	1-7-94
	Enlarged to include part of Northcote (C) from Northern Middle Melbourne. Renamed Inner Melbourne	1-7-95
East Barwon	Reduced by transfer of part of Barrabool (S) - Pt B and part of South Barwon (S) - Pt B to Greater Geelong City Part A	1-7-94
	Enlarged to include Surf Coast (S) - Pt B and part of Colac (S) from West Barwon	1-7-95
East Central Highlands	Enlarged to include part of Bungaree (S) - Pt A and part of Buninyong (S) - Pt A from Ballarat; reduced by transfer of part of Buninyong (S) - Pt B to Ballarat City, and part of Buninyong (S) - Pt B to West Central Highlands	1-7-94
	Enlarged to include part of Werribee (C) from Western Fringe Melbourne, part of Talbot & Clunes (S) from West Central Highlands; and part of Kyneton (S) from South Loddon-Campaspe	1-7-95
East Gippsland Shire	See Gippsland Lakes	1-7-95
East Mallee	Reduced by transfer of part of Swan Hill (S) to West Mallee	1-7-92
	Enlarged to include part of Cohuna (S) from Northern Loddon-Campaspe	1-7-95
East Ovens-Murray	See South Ovens-Murray	1-7-95
Eastern Fringe Melbourne	Reduced by transfer of part of Healesville (S) to Northern Outer Melbourne; part of Healesville (S) to South West Goulburn; part of Lillydale (S) to Eastern Middle Melbourne; part of Lillydale (S) and part of Sherbrooke (S) to Eastern Outer Melbourne; part of Sherbrooke (S) to South Eastern Outer Melbourne. Renamed Yarra Ranges Shire Part A	1-7-95
Eastern Inner Melbourne	Renamed Boroondara City	1-7-95
Eastern Middle Melbourne	Reduced by transfer of part of Doncaster & Templestowe (C) to Eastern Outer Melbourne. Enlarged to include Nunawading (C) from Eastern Outer Melbourne, part of Lillydale (S) from Eastern Fringe Melbourne and part of Oakleigh (C) from Southern Outer Melbourne	1-7-95
Eastern Outer Melbourne	Reduced by transfer of Nunawading (C) to Eastern Middle Melbourne, and part of Knox (C) to South Eastern Outer Melbourne. Enlarged to include part of Doncaster & Templestowe (C) from Eastern Middle Melbourne and part of Lillydale (S) and part of Sherbrooke (S) from Eastern Fringe Melbourne	1-7-95
Frankston City	See Mornington Peninsula Inner	1-7-95
Geelong	Enlarged to include part of Barrabool (S) - Pt B and part of South Barwon (S) - Pt B from East Barwon. Renamed Greater Geelong City Part A	1-7-94
Gippsland Lakes	Enlarged to include Orbost (S), Tambo (S) - Pt B, part of Bairnsdale (S) - Pt B and part of Omeo (S) from Mitchell-Snowy. Renamed East Gippsland Shire	1-7-95
Glencelg	Reduced by transfer of Minhamite (S), part of Dundas (S), and part of Mount Rouse (S) to Hopkins, and part of Glencelg (S) to South Wimmera. Enlarged to include part of Kowrec (S) from South Wimmera	1-7-95
Greater Bendigo City Part A	Renamed from Bendigo	1-7-94
	Enlarged to include part of Gr. Bendigo (C) - Pt B from North Loddon	1-7-96

Greater Dandenong City	See South Eastern Inner Melbourne	1-7-95
Greater Geelong City Part A	See Geelong	1-7-94
Greater Shepparton City Part A	Renamed from Shepparton-Mooroopna	1-7-95
Hopkins	Enlarged to include part of Otway (S) from West Barwon Reduced by transfer of part of Heytesbury (S) to West Barwon. Enlarged to include part of Otway (S) from West Barwon; Minhamite (S), part of Dundas (S) and part of Mount Rouse (S) from Glenelg	1-7-93 1-7-95
Hume City	See Northern Fringe Melbourne	1-7-95
Inner Melbourne	See Central Melbourne	1-7-95
Latrobe Valley	Enlarged to include Morwell (C) - Pt B, Traralgon (S) - Pt B and part of Rosedale (S) from Strzelecki; part of Narracan (S) - Pt B from West Gippsland. Renamed La Trobe Valley	1-7-95
Macalister-Avon	Enlarged to include part of Bairnsdale (S) - Pt B from Mitchell-Snowy; Alberton (S) and part of Rosedale (S) from Strzelecki. Renamed Wellington Shire	1-7-95
Melton-Wyndham	Renamed from Western Fringe Melbourne	1-7-96
Mildura	Renamed Mildura Rural City Part A	1-7-95
Mildura Rural City Part A	Renamed from Mildura	1-7-95
Mitchell-Snowy	Abolished. Lost Orbost (S), Tambo (S) - Pt B, part of Bairnsdale (S) - Pt B and part of Omeo (S) to East Gippsland Shire; part of Bairnsdale (S) - Pt B to Wellington Shire; and part of Omeo (S) to East Ovens-Murray	1-7-95
Moreland City	See Northern Inner Melbourne	1-7-95
Mornington Peninsula Inner	Reduced by transfer of Chelsea (C) to Southern Melbourne and part of Frankston (C) to Mornington Peninsula Shire; enlarged to include part of Springvale (C) from South Eastern Inner Melbourne and part of Cranbourne (C) from South Eastern Outer Melbourne. Renamed Frankston City	1-7-95
Mornington Peninsula Outer	Enlarged to include part of Cranbourne (C) from South Eastern Outer Melbourne and part of Frankston (C) from Mornington Peninsula Inner. Renamed Mornington Peninsula Shire	1-7-95
Mornington Peninsula Shire	See Mornington Peninsula Outer	1-7-95
North Goulburn	Enlarged to include Echuca (C), Rochester (S), part of Cohuna (S) and part of Gordon (S) from Northern Loddon-Campaspe; part of Euroa (S), part of Goulburn (S) and part of Violet Town (S) from South Goulburn; and part of Yarrawonga (S) from North Ovens-Murray	1-7-95
North Loddon	See Northern Loddon-Campaspe Reduced by transfer of part of Gr. Bendigo (C) - Pt B to Greater Bendigo City Part A	1-7-95 1-7-96
North Ovens-Murray	Reduced by transfer of part of Yarrawonga (S) to North Goulburn Enlarged to include part of Benalla (S) from South Goulburn, part of Beechworth (S) from Wodonga and part of Oxley (S) from South Ovens-Murray. Renamed West Ovens-Murray	1-7-95
North Wimmera	Reduced by transfer of Kaniva (S), part of Dunmunkle (S) and part of Donald (S) to South Wimmera; and part of Donald (S) to West Mallee. Enlarged to include part of Wimmera (S) from South Wimmera and Karkarooc (S) from West Mallee	1-7-95
Northern Fringe Melbourne	Reduced by transfer of part of Broadmeadows (C) to Moreland City and part of Bulla (S) to Western Fringe Melbourne. Enlarged to include parts of Keilor (C) from Western Outer Melbourne and part of Whittlesea (C) from Northern Outer Melbourne. Renamed Hume City	1-7-95
Northern Inner Melbourne	Reduced by transfer of part of Brunswick (C) to Central Melbourne Reduced by transfer of part of Coburg (C) to Northern Middle Melbourne. Enlarged to include part of Broadmeadows (C) from Northern Fringe Melbourne. Renamed Moreland City	1-7-93 1-7-95

Northern Loddon-Campaspe	Reduced by transfer of Charlton (S) to West Mallee; part of Cohuna (S) to East Mallee; Echuca (C), Rochester (S), part of Cohuna (S) and part of Gordon (S) to North Goulburn. Enlarged to include part of Talbot & Clunes (S) from West Central Highlands; Castlemaine (C), Gr. Bendigo (C) - Huntly Bal, Gr. Bendigo (C) - S'saye Bal, Maryborough (C), Newstead (S), Bet Bet (S), Gr. Bendigo (C) - Marong Bal, Maldon (S), Meicaffe (S), Tullaroop (S) and part of Melvor (S) from Central Loddon-Campaspe. Renamed North Loddon. (see North Loddon)	1-7-95
Northern Middle Melbourne	Reduced by transfer of part of Northcote (C) to Inner Melbourne Enlarged to include part of Coburg (C) from Northern Inner Melbourne and parts of Diamond Valley (S) and part of Eltham (S) from Northern Outer Melbourne	1-7-95
Northern Outer Melbourne	Reduced by transfer of parts of Diamond Valley (S) and part of Eltham (S) to Northern Middle Melbourne; part of Eltham (S) and part of Whittlesea (C) to South West Goulburn; and part of Whittlesea (C) to Hume City. Enlarged to include part of Healesville (S) from Eastern Fringe Melbourne	1-7-95
Shepparton-Mooroopna	Renamed Greater Shepparton City Part A	1-7-95
South Eastern Inner Melbourne	Reduced by transfer of part of Springvale (C) to Southern Melbourne and part of Springvale (C) to Frankston City Enlarged to include part of Berwick (C) and part of Cranbourne (C) from South Eastern Outer Melbourne. Renamed Greater Dandenong City	1-7-95
South Eastern Outer Melbourne	Reduced by transfer of part of Berwick (C) and part of Cranbourne (C) to Greater Dandenong City; and parts of Cranbourne (C) to Frankston City, Mornington Peninsula Shire, and South Gippsland. Enlarged to include part of Knox (C) from Eastern Outer Melbourne and parts of Sherbrooke (S) from Eastern Fringe Melbourne	1-7-95
South Gippsland	Enlarged to include part of Cranbourne (C) from South Eastern Outer Melbourne and Mirboo (S) from Strzelecki	1-7-95
South Goulburn	Reduced by transfer of Alexandra (S) and part of Euroa (S) to South West Goulburn; part of Benalla (S) to West Ovens-Murray; part of Euroa (S), part of Goulburn (S) and part of Violet Town (S) to North Goulburn. Enlarged to include part of Melvor (S) from Central Loddon-Campaspe and part of Seymour (RC) from South West Goulburn	1-7-95
South Loddon	See South Loddon-Campaspe	1-7-95
South Loddon-Campaspe	Reduced by transfer of Pyalong (S) to South West Goulburn, and part of Kyneton (S) to East Central Highlands. Renamed South Loddon	1-7-95
South Ovens-Murray	Reduced by transfer of part of Bright (S) to Wodonga Reduced by transfer of part of Oxley (S) to West Ovens-Murray Enlarged to include part of Beechworth (S) and part of Yackandandah (S) from Wodonga and part of Omeo (S) from Mitchell-Snowy. Renamed East Ovens-Murray	1-7-92 1-7-95
South West Goulburn	Reduced by transfer of part of Seymour (RC) to South Goulburn Enlarged to include part of Eltham (S) and part of Whittlesea (C) from Northern Outer Melbourne; part of Healesville (S) from Eastern Fringe Melbourne; part of Melvor (S) from Central Loddon-Campaspe; Pyalong (S) from South Loddon-Campaspe; Alexandra (S) and part of Euroa (S) from South Goulburn	1-7-95
South Wimmera	Reduced by transfer of part of Kowree (S) to Glenelg; part of Kara Kara (S) to West Mallee; part of Stawell (S) to West Central Highlands; and part of Wimmera (S) to North Wimmera. Enlarged to include part of Glenelg (S) from Glenelg; part of Ararat (S) and part of Avoca (S) from West Central Highlands; and Kaniva (S), part of Dunmunkle (S) and part of Donald (S) from North Wimmera	1-7-95
Southern Inner Melbourne	Enlarged to include Mordialloc (C), Moorabbin (C), and part of Oakleigh (C) from Southern Outer Melbourne; part of Springvale (C) from South Eastern Inner Melbourne; and Chelsea (C) from Mornington Peninsula Inner. Renamed Southern Melbourne	1-7-95
Southern Outer Melbourne	Abolished. Part of Oakleigh (C) transferred to Eastern Middle Melbourne, and Mordialloc (C), Moorabbin (C), and part of Oakleigh (C) transferred to Southern Melbourne	1-7-95
Southern Melbourne	See Southern Inner Melbourne	1-7-95

Strzelecki	Enlarged to include part of Narracan (S) - Pt B from West Gippsland Abolished. Alberton (S) and part of Rosedale (S) transferred to Wellington Shire; Mirboo (S) to South Gippsland; Morwell (C) - Pt B, Traralgon (S) - Pt B and part of Rosedale (S) to La Trobe Valley	1-7-92 1-7-95
Wellington Shire	See Macalister-Avon	1-7-95
West Barwon	Reduced by transfer of part of Otway (S) to Hopkins Reduced by transfer of Surf Coast (S) - Pt B and part of Colac (S) to East Barwon, and part of Otway (S) to Hopkins. Enlarged to include Southern Rural (S) - West from West Central Highlands and part of Heytesbury (S) from Hopkins	1-7-93 1-7-95
West Central Highlands	Enlarged to include part of Buninyong (S) - Pt B from East Central Highlands; part of Buninyong (S) - Pt A and part of Grenville (S) - Pt A from Ballarat. Reduced by transfer of Ballarat (S) - Pt B and small part of Ripon (S) to Ballarat City Reduced by transfer of part of Ararat (S) and part of Avoca (S) to South Wimmera; Southern Rural (S) - West to West Barwon; parts of Talbot & Clunes (S) to East Central Highlands and North Loddon Enlarged to include part of Stawell (S) from South Wimmera	1-7-94 1-7-95
West Gippsland	Reduced by transfer of part of Narracan (S) - Pt B to Strzelecki Reduced by transfer of part of Narracan (S) - Pt B to La Trobe Valley	1-7-92 1-7-95
West Mallee	Enlarged to include Swan Hill (S) from East Mallee Reduced by transfer of Karkaroc (S) to North Wimmera Enlarged to include part of Kara Kara (S) from South Wimmera; part of Donald (S) from North Wimmera; and Charlton (S) from Northern Loddon-Campaspe	1-7-92 1-7-95
West Ovens-Murray	See North Ovens-Murray	1-7-95
Western Fringe Melbourne	Reduced by transfer of part of Werribee (C) to Western Melbourne and East Central Highlands. Enlarged to include part of Bulla (S) from Northern Fringe Melbourne Renamed Melton-Wyndham	1-7-95 1-7-96
Western Inner Melbourne	Enlarged to include part of Keilor (C) from Western Outer Melbourne Reduced by transfer of part of Essendon (C) to Central Melbourne Enlarged to include part of Melbourne (C) - Remainder from Central Melbourne (overall area reduced) Enlarged to include Altona (C), Sunshine (C), and parts of Keilor (C) from Western Outer Melbourne; and part of Werribee (C) from Western Fringe Melbourne. Renamed Western Melbourne	1-7-92 1-7-94 1-7-95
Western Outer Melbourne	Reduced by transfer of part of Keilor (C) to Western Inner Melbourne Abolished. Altona (C), Sunshine (C), and parts of Keilor (C) transferred to Western Melbourne; parts of Keilor (C) to Hume City	1-7-92 1-7-95
Western Melbourne	See Western Inner Melbourne	1-7-95
Wodonga	Enlarged to include part of Bright (S) from South Ovens-Murray Reduced by transfer of part of Beechworth (S) to West Ovens-Murray; part of Beechworth (S) and part of Yackandandah (S) to East Ovens-Murray	1-7-92 1-7-95
Yarra Ranges Shire Part A	See Eastern Fringe Melbourne	1-7-95
STATISTICAL DISTRICT		
<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Albury-Wodonga (NSW/VIC)	Minor boundary adjustment to include a small part transferred from Bright (S) to Yackandandah (S) The southern boundary was aligned with the boundary of Indigo (S), resulting in a reduction in area.	1-7-92 1-7-95
Ballarat	Boundary redefined to align with Ballarat City LGA boundary	1-7-94
Bendigo	Enlarged to include a part transferred from Gr. Bendigo (C) - Pt B to Gr. Bendigo (C) - S'saye	1-7-96

Geelong	Enlarged to include small areas from Barabool (S) - Pt B and an area from South Barwon (S) - Pt B	1-7-94
Shepparton	Renamed from Shepparton-Mooroopna	1-7-95
Shepparton-Mooroopna	Renamed Shepparton. Area unchanged	1-7-95
La Trobe Valley	Enlarged to include the whole of La Trobe (S) with part of Baw Baw (S), and the Yallourn Works Area	1-7-95

Yarriambiack (S) - North	Renamed from Karkarooc (S)	nil	1-7-95
Yarriambiack (S) - South	Created from Warracknabeal (S), major part of Dunmunkle (S), and part of Wimmera (S)	+338140	1-7-95
Yea (S)	Gained from Broadford (S) Included in Murrindindi (S) - West	+ 1200	1-7-93 1-7-95

## CHANGES TO GEOGRAPHICAL AREAS 1991-1996 QUEENSLAND

### STATISTICAL DIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Brisbane	Minor boundary adjustment with Moreton	1-7-95
Moreton	Minor boundary adjustment with Brisbane	1-7-95

### STATISTICAL SUBDIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Albert Shire Part A	Minor part transferred to Beaudesert Shire Part A; remainder renamed Gold Coast City Part A	1-7-95
Albert Shire Part B	Minor part transferred to Moreton SD Bal; remainder included in Gold Coast City Part B	1-7-95
Beaudesert Shire Part A	Enlarged to include part of Albert (S) Bal in BSD from Albert Shire Part A; reduced by transfer of part of Beaudesert (S) Bal in BSD to Gold Coast City Part A	1-7-95
Brisbane City	Enlarged to include part of Rochedale South from Logan City; reduced by transfer of Underwood - Pt A and small part of Karawatha to Logan City	1-7-94
	Enlarged to include small part of Ipswich (C) and small part of Carole Park from Ipswich-Moreton Shire Part A	1-7-95
Bundaberg	Enlarged to include small part of Gooburrum (S) - Pt B from, and reduced by transfer of the western part of Woongarra (S) - Pt A to, Wide Bay-Burnett SD Bal	1-7-94
Cairns	Enlarged to include a small part of Douglas (S) and small parts of Mareeba (S) from Far North SD Bal. Renamed Cairns City Part A	1-7-95
Cairns City Part A	Created from Cairns SSD and small parts of Far North SD Bal SSD	1-7-95
Darling Downs	Split into 2 SSDs: Toowoomba City and Darling Downs SD Bal	1-7-96
Darling Downs SD Bal	Created from part of Darling Downs SSD	1-7-96
Far North SD Bal	Reduced by transfer of a small part of Douglas (S) and small parts of Mareeba (S) to Cairns City Part A	1-7-95
Gold Coast City	Amalgamated with most of Albert Shire Part B and small part of Moreton SD Bal to form Gold Coast City Part B	1-7-95
Gold Coast City Part A	Created from major part of Albert Shire Part A and minor part of Beaudesert Shire Part A	1-7-95
Gold Coast City Part B	Created from Gold Coast City, major part of Albert Shire Part B and a small part of Moreton SD Bal	1-7-95
Ipswich City Part A	Created from major part of Ipswich-Moreton Shire Part A and a small part from Moreton SD Bal	1-7-95
	Renamed Ipswich City (Part in BSD)	1-7-96
Ipswich City (Part in BSD)	Renamed from Ipswich City Part A	1-7-96
Ipswich-Moreton Shire Part A	Reduced by transfer of small part of Ipswich (C) and small part of Carole Park to Brisbane City, a small part of Camira to Logan City, and a small part of Moreton (S) Bal in BSD - Nth to Moreton SD Bal. Enlarged to include small part of Moreton (S) - Pt B from Moreton SD Bal.	1-7-95
	Renamed Ipswich City Part A	
	Renamed Ipswich City (Part in BSD)	1-7-96

Logan City	Enlarged to include Underwood - Pt A and a small part of Karawatha from Brisbane City; reduced by transfer of part of Rochedale South to Brisbane City	1-7-94
	Enlarged to include a small part of Camira from Ipswich-Moreton Shire Part A	1-7-95
Mackay	Renamed Mackay City Part A	1-7-94
Mackay City Part A	Renamed from Mackay	1-7-94
	Enlarged to include part of Mackay (C) - Pt B from Mackay SD Bal	1-7-96
Mackay SD Bal	Reduced by transfer of part of Mackay (C) - Pt B to Mackay City Part A	1-7-96
Moreton SD Bal	Enlarged to include part of Albert (S) - Pt B Bal from Albert Shire Part B, and a small part of Moreton (S) Bal in BSD - Nth from Ipswich-Moreton Shire Part A; reduced by transfer of part of Beaudesert (S) - Pt B to Gold Coast City Part B and a small part of Moreton (S) - Pt B to Ipswich City Part A	1-7-95
	Reduced by transfer of part of Maroochy (S) - Pt B to Sunshine Coast	1-7-96
Northern SD Bal	Enlarged to include part of Townsville (C) Bal from Townsville City	1-7-94
Sunshine Coast	Enlarged to include part of Maroochy (S) - Pt B from Moreton SD Bal	1-7-96
Toowoomba City	Created from part of Darling Downs SSD	1-7-96
Townsville City	Reduced by transfer of part of Townsville (C) Bal to Northern SD Bal; renamed Townsville City Part A	1-7-94
Townsville City Part A	Created from major part of Townsville City	1-7-94
Wide Bay-Burnett SD Bal	Reduced by transfer of small part of Gooburrum (S) - Pt B to, and enlarged to include the western part of Woongarra (S) - Pt A from, Bundaberg	1-7-94

#### STATISTICAL DISTRICT

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Bundaberg	Redefined to include part from Gooburrum (S) - Pt B and exclude part of Woongarra (S) - Pt A	1-7-94
Cairns	Enlarged by 3159 ha to include small parts from Douglas (S) and Mareeba (S)	1-7-95
Gold Coast-Tweed (QLD/NSW)	Minor boundary adjustment to include small parts from Beaudesert (S) - Pt B and exclude a small part of Albert (S) - Pt B Bal	1-7-95
Mackay	Enlarged to include an area from Mackay (C) - Pt B	1-7-96
Sunshine Coast	Enlarged to include 1624 ha from Maroochy (S) - Pt B	1-7-96
Townsville	Redefined to exclude the part of Townsville (C) Bal transferred to Hinchinbrook (S)	1-7-94

#### STATISTICAL LOCAL AREA

<i>Area</i>	<i>Nature of change</i>	<i>Approx. change in area (ha)</i>	<i>Date of change to ASGC</i>
Acacia Ridge	Lost to Sunnybank Hills	- 30	1-7-92

Fingal (M)	Major part included in Break O'Day (M); remainder included in Northern Midlands (M) - Pt B and Dorset (M)		1-7-93
Glamorgan (M)	Major part included in Glamorgan/Spring Bay (M); remainder included in Break O'Day (M) and Northern Midlands (M) - Pt B		1-7-93
Glamorgan/Spring Bay (M)	Created from major part of Spring Bay (M), major part of Glamorgan (M), and small parts of Sorell (M) - Pt B, Ross (M) and Outlands (M)		1-7-93
Glenorchy (C)	Lost to New Norfolk (M) - Pt B	negligible	1-7-93
Green Ponds (M)	Major part included in Southern Midlands (M); remainder included in Central Highlands (M)		1-7-93
Hamilton (M)	Major part included in Central Highlands (M); remainder included in New Norfolk (M) - Pt B		1-7-93
Hobart (C) - Remainder	Lost to Kingborough (M) - Pt A	negligible	1-7-93
Huon (M)	Major part included in Huon Valley (M); remainder included in Kingborough (M) - Pt A and New Norfolk (M) - Pt B		1-7-93
Huon Valley (M)	Created from major part of Esperance (M), major part of Port Cygnet (M) and major part of Huon (M)		1-7-93
Kentish (M)	Lost to Latrobe (M) - Pt B	-531	1-7-93
Kingborough (M) - Pt A	Gained from Huon (M) and Hobart (C) - Remainder	negligible	1-7-93
Kingborough (M) - Pt B	Gained Bruny (M) and a small part from Port Cygnet (M)	+36276	1-7-93
Latrobe (M) - Pt A	Lost to Devonport (C)	-87	1-7-93
	Gained from Latrobe (M) - Pt B	+5064	1-7-96
Latrobe (M) - Pt B	Gained from Beaconsfield (M) - Pt B	+1466	1-7-93
	Gained from Kentish (M)	+531	1-7-93
	Gained from Deloraine (M)	negligible	1-7-93
	Gained from Westbury (M) - Pt B		1-7-93
	Lost to Latrobe (M) - Pt A	-5064	1-7-96
Launceston (C) - Pt B	Gained from Evandale (M) - Pt A	+400	1-7-93
	Gained from Westbury (M) - Pt A	+113	1-7-93
Launceston (C) - Pt C	Lost to Dorset (M)	-18930	1-7-93
Longford (M) - Pt A	Included in Northern Midlands (M) - Pt A		1-7-93
Longford (M) - Pt B	Major part included in Northern Midlands (M) - Pt B; remainder included in Central Highlands (M)		1-7-93 1-7-93
Lyell (M)	Included in West Coast (M)		1-7-93
Meander Valley (M) - Pt A	Created from major part of Westbury (M) - Pt A		1-7-93
Meander Valley (M) - Pt B	Created from major part of Westbury (M) - Pt B and major part of Deloraine (M)		1-7-93
New Norfolk (M) - Pt A	Gained from New Norfolk (M) - Pt B	+2630	1-7-93
	Renamed Derwent Valley (M) - Pt A	nil	1-7-96
New Norfolk (M) - Pt B	Lost to New Norfolk (M) - Pt A	-2630	1-7-93
	Gained from Hamilton (M)	+119700	1-7-93
	Gained from Esperance (M)	+145000	1-7-93
	Gained from Surahan (M)	+16750	1-7-93
	Gained from Glenorchy (C)	negligible	1-7-93
	Gained from Huon (M)	+2764	1-7-93
	Lost to Southern Midlands (M)	-896	1-7-93
	Renamed Derwent Valley (M) - Pt B	nil	1-7-96
Northern Midlands (M) - Pt A	Created from Longford (M) - Pt A and major part of Evandale (M) - Pt A		1-7-93
Northern Midlands (M) - Pt B	Created from Evandale (M) - Pt B, major part of Campbell Town (M), major part of Longford (M) - Pt B, major part of Ross (M), part of Fingal (M) and small parts of Glamorgan (M)		1-7-93

Oatlands (M)	Major part included in Southern Midlands (M); remainder included in Glamorgan/Spring Bay (M) and Central Highlands (M)		1-7-93
Penguin (M) - Pt A	Included in Central Coast (M) - Pt A		1-7-93
Penguin (M) - Pt B	Included in Central Coast (M) - Pt B		1-7-93
Port Cygnet (M)	Major part included in Huon Valley (M); remainder included in Kingborough (M) - Pt B		1-7-93
Portland (M)	Major part included in Break O'Day (M); remainder included in Dorset (M)		1-7-93
Richmond (M)	Lost to Southern Midlands (M); remainder included in Clarence (C)		1-7-93
Ringarooma (M)	Included in Dorset (M)		1-7-93
Ross (M)	Major part included in Northern Midlands (M) - Pt B; remainder included in Glamorgan/Spring Bay (M) and Central Highlands (M)		1-7-93
Scottsdale (M)	Included in Dorset (M)		1-7-93
Sorell (M) - Pt A	Gained from Sorell (M) - Pt B	+16150	1-7-93
Sorell (M) - Pt B	Lost to Sorell (M) - Pt A, Tasman (M) and Glamorgan/Spring Bay (M)		1-7-93
Southern Midlands (M)	Created from major part of Green Ponds (M), major part of Oatlands (M), part of Richmond (M), part of Brighton (M) - Pt B, and small parts of Spring Bay (M) and New Norfolk (M) - Pt B		1-7-93
Spring Bay (M)	Major part included in Glamorgan/Spring Bay (M); remainder included in Southern Midlands (M)		1-7-93
Strahan (M)	Major part included in West Coast (M); remainder included in New Norfolk (M) - Pt B		1-7-93
Tasman (M)	Gained from Sorell (M) - Pt B	+18700	1-7-93
Ulverstone (M) - Pt A	Included in Central Coast (M) - Pt A		1-7-93
Ulverstone (M) - Pt B	Included in Central Coast (M) - Pt B		1-7-93
Waratah (M)	Included in Waratah/Wynyard (M) - Pt B		1-7-93
Waratah/Wynyard (M) - Pt A	Renamed from Wynyard (M) - Pt A	nil	1-7-93
Waratah/Wynyard (M) - Pt B	Created from Waratah (M) and the major part of Wynyard (M) - Pt B		1-7-93
West Coast (M)	Created from Lyell (M), Zeehan (M) and the major part of Strahan (M)		1-7-93
West Tamar (M) - Pt A	Renamed from Beaconsfield (M) - Pt A	nil	1-7-93
West Tamar (M) - Pt B	Created from major part of Beaconsfield (M) - Pt B and part of Westbury (M) - Pt B		1-7-93
Westbury (M) - Pt A	Major part included in Meander Valley (M) - Pt A; remainder included in Launceston (C) - Pt B		1-7-93
Westbury (M) - Pt B	Major part included in Meander Valley (M) - Pt B; remainder included in Latrobe (M) - Pt B and West Tamar (M) - Pt B		1-7-93
Wynyard (M) - Pt A	Renamed Waratah/Wynyard (M) - Pt A	nil	1-7-93
Wynyard (M) - Pt B	Major part included in Waratah/Wynyard (M) - Pt B; remainder included in Circular Head (M)		1-7-93
Zeehan (M)	Included in West Coast (M)		1-7-93

CHANGES TO GEOGRAPHICAL AREAS 1991-1996  
NORTHERN TERRITORY

STATISTICAL LOCAL AREA

<i>Area</i>	<i>Nature of change</i>	<i>Approx. change in area (ha)</i>	<i>Date of change to ASGC</i>
Alice Springs (T)	Lost to Sandover - Bal Split into 5 new SLAs: Alice Springs (T) - Charles, Alice Springs (T) - Heavitree, Alice Springs (T) - Larapinta, Alice Springs (T) - Ross and Alice Springs (T) - Stuart	-9105	1-7-96 1-7-96
Alice Springs (T) - Charles	Created from part of Alice Springs (T)		1-7-96
Alice Springs (T) - Heavitree	Created from part of Alice Springs (T)		1-7-96
Alice Springs (T) - Larapinta	Created from part of Alice Springs (T)		1-7-96
Alice Springs (T) - Ross	Created from part of Alice Springs (T)		1-7-96
Alice Springs (T) - Stuart	Created from part of Alice Springs (T)		1-7-96
Elsey - Bal	Gained from Katherine (T)	+56	1-7-96
Katherine (T)	Lost to Elsey - Bal	-56	1-7-96
Sandover - Bal	Gained from Alice Springs (T)	+9105	1-7-96

CHANGES TO GEOGRAPHICAL AREAS 1991-1996  
AUSTRALIAN CAPITAL TERRITORY

STATISTICAL DIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Australian Capital Territory - Bal	Reduced by transfer of Jervis Bay Territory to new State/Territory 'Other Territories'	1-7-93

STATISTICAL SUBDIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Australian Capital Territory - Bal	Reduced by transfer of Jervis Bay Territory to new State/Territory 'Other Territories'	1-7-93
Belconnen	Part (Black Mountain) transferred from Belconnen - SSD Bal to Acton in North Canberra	1-7-96
Central Canberra	Abolished. SAs split between North Canberra and South Canberra	1-7-96
Gungahlin-Hall	New SSD created from part of Outer Canberra	1-7-96
North Canberra	Created from part of Central Canberra. Also includes Kowen, major part of Majura and a small area from Belconnen - SSD Bal SAs	1-7-96
Outer Canberra	Abolished. Component SAs transferred to North Canberra, South Canberra, Weston Creek-Stromlo and Gungahlin-Hall SSDs	1-7-96
South Canberra	Created from part of Central Canberra. Also includes SAs of Harman, Hume, Jerrabomberra, Oaks Estate, Pialligo, Symonston and a small part of Majura from Outer Canberra SSD	1-7-96
Weston Creek	Enlarged to include Stromlo SA from Outer Canberra; renamed Weston Creek-Stromlo	1-7-96
Weston Creek-Stromlo	Created from previous Weston Creek SSD and Stromlo SA from Outer Canberra SSD	1-7-96

STATISTICAL DISTRICT

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Canberra-Queanbeyan (ACT/NSW)	Enlarged to include part transferred from Yarrowlumla (A) to Queanbeyan (C) (1722ha)	1-7-95
	Enlarged to include Yarrowlumla (A) - Pt A	1-7-96

STATISTICAL LOCAL AREA

<i>Area</i>	<i>Nature of change</i>	<i>Approx. change in area (ha)</i>	<i>Date of change to ASGC</i>
Acton	Gained part (Black Mountain) from Belconnen - SSD Bal		1-7-96
Amaroo	Created from part of Gungahlin - Bal	+310	1-7-95
Banks	Created from part of Tuggeranong - SSD Bal	+236	1-7-92

Belconnen - SSD Bal	Lost to Dunlop Lost part (Black Mountain) to Acton	-334	1-7-95 1-7-96
Conder	Created from part of Tuggeranong - SSD Bal	+413	1-7-92
Dunlop	Created from part of Belconnen - SSD Bal	+334	1-7-95
Gungahlin	Abolished. Split between Palmerston and Gungahlin - Bal	-8567	1-7-93
Gungahlin - Bal	Created from part of Gungahlin Lost to Ngannawal and Nicholls Lost to Amaroo Renamed Gungahlin-Hall - SSD Bal	+8371 +1077 -310 nil	1-7-93 1-7-94 1-7-95 1-7-96
Gungahlin-Hall - SSD Bal	Renamed from Gungahlin - Bal	nil	1-7-96
Jervis Bay Territory	Excluded from ACT for statistical purposes and included in new State/Territory 'Other Territories'		1-7-93
Majura	Lost to Pialligo		1-7-96
Ngannawal	Created from part of Gungahlin - Bal	+410	1-7-94
Nicholls	Created from part of Gungahlin - Bal	+667	1-7-94
Palmerston	Created from part of Gungahlin	+196	1-7-93
Pialligo	Gained from Majura		1-7-96
Tuggeranong - SSD Bal	Lost to Conder and Banks	-649	1-7-92
Weston Creek - SSD Bal	Renamed Weston Creek-Stromlo - SSD Bal	nil	1-7-96
Weston Creek-Stromlo - SSD Bal	Renamed from Weston Creek - SSD Bal	nil	1-7-96

# CHANGES TO GEOGRAPHICAL AREAS 1991-1996 OTHER TERRITORIES

## STATE/TERRITORY

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Other Territories	New State/Territory in ASGC. Comprises Jervis Bay Territory (previously included with ACT), and the external territories of Christmas Island and Cocos (Keeling) Islands which are now included within the scope of the ASGC.	1-7-93

## STATISTICAL DIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Other Territories	New SD in Other Territories State/Territory. Comprises the SLAs of Jervis Bay Territory, Territory of Christmas Island and Territory of Cocos (Keeling) Islands	1-7-93

## STATISTICAL SUBDIVISION

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Other Territories	New SSD in Other Territories SD. Comprises the SLAs of Jervis Bay Territory, Territory of Christmas Island and Territory of Cocos (Keeling) Islands	1-7-93

## STATISTICAL LOCAL AREA

<i>Area</i>	<i>Nature of change</i>	<i>Date of change to ASGC</i>
Jervis Bay Territory	Previously in ACT for statistical purposes Now included as an SLA in Other Territories	1-7-93
Territory of Christmas Island	New SLA. This territory was previously outside the scope of the ASGC.	1-7-93
Territory of Cocos (Keeling) Islands	New SLA. This territory was previously outside the scope of the ASGC.	1-7-93

## **APPENDIX 5**

### **CHANGES BETWEEN ASGC EDITION 2.5 AND THE 1996 EDITION**

## CHANGES BETWEEN ASGC EDITION 2.5 AND THE 1996 EDITION

All statistically significant changes are listed below, including changes in ASGC code numbers only. Some minor spatial unit changes that involve no changes in ASGC spatial unit codes are not included in this Appendix. These include spatial unit boundary changes which involve no significant transfers of households or economic units from one spatial unit to another. However known changes of this type are recorded in Appendix 3 Changes to Geographical Areas 1991-1996 in this edition.

Spatial unit splits/amalgamations are indicated by 'link' lines in the table of changes below.

Edition 2.5 ASGC Spatial Units		1996 Edition ASGC Spatial Units		Comments on Changes
<b>NEW SOUTH WALES</b>				
<u>Statistical Subdivisions</u>				
SSD Code	Name	SSD Code	Name	
05 (SD 05) 10 (SD 05)	Inner Sydney Eastern Suburbs		Inner Sydney Eastern Suburbs	See Randwick (C) / South Sydney (C) LGAs / SLAs.
05 (SD 45) 10 (SD 45)	Queanbeyan Southern Tablelands (excl. Queanbeyan)		Queanbeyan Southern Tablelands (excl. Queanbeyan)	Queanbeyan SSD enlarged to include Yarrowlumla (A) - Pt A SLA.
<u>Local Government Areas (and Statistical Local Areas)</u>				
LGA/SLA Code	Name	LGA/SLA Code	Name	
6550 7070	Randwick (C) South Sydney (C)		Randwick (C) South Sydney (C)	Net change in area approximately 3.55ha.
8650	Yarrowlumla (A)		Yarrowlumla (A) - Pt A Yarrowlumla (A) - Pt B	Split into two SLAs. Yarrowlumla (A) - Pt A has been included in Queanbeyan SSD, and the Canberra-Queanbeyan S Dist.
<b>VICTORIA</b>				
<u>Statistical Subdivisions</u>				
SSD Code	Name	SSD Code	Name	
20 (SD 05)	Western Fringe Melbourne	20	Melton-Wyndham	Renamed.
05 (SD 35) 10 (SD 35)	Greater Bendigo City Part A North Loddon		Greater Bendigo City Part A North Loddon	Greater Bendigo City Part A SSD enlarged to include a part transferred from Gr. Bendigo (C) - Pt B SLA to Gr. Bendigo (C) - S'saye.
